General Summary for Wednesday, 16 September, 2020

British Mountain Summary:

Based on forecast chart for noon 16 September, 2020

Cloud and patchy rain across central and southern Scotland will tend to break up. Many summits in the Highlands gradually clearing - coolest on eastern hills. Low cloud and small amounts of rain for the Pennines, but the Lakes and Wales mainly dry and clear.

Headline for Snowdonia National Park

Western hills mostly clear, dry. Increasingly gusty.

Detailed Forecast for Wednesday, 16 September, 2020

How windy? (On the summits)	Easterly 15 to 25mph, typically strongest toward evening.
Effect of wind on you?	Fairly small, but increasingly gusty in places into corries and passes.
How wet? (Precipitation and its impact)	Chance a light shower Chance of local showers drifting in from the east in afternoon.
Cloud on the hills?	Mostly very little; risk fog banks forming east. Risk banks of cloud rolling in across eastern hills to give hill fog above 500-600m around Berwyn Mountains for a few hours, mostly middle of day onward. Further west, occasional patches of fog forming on hills, but mostly clear.
Chance of cloud free summits?	80% west, dropping to 40% east afternoon.
Sunshine? Air clarity (below cloud)	Patchy sun, sometimes through high level cloud. Visibility generally very good.
How Cold? (at 900m)	13C, up to locally 16C in west; little change night into day, valleys cooler after dawn. Tending to drop a degree or so toward evening from east.
Freezing Level	Above the summits.

Snowdonia National Park - Looking Ahead

	Thursday 17 September	Friday 18 September
How windy? (On the summits)	Easterly 15mph, may be locally gusty 25mph through some passes.	East to northeasterly, 15 to 25mph, tending to strengthen, risk local gusts over 30mph.
Effect of wind on you?	Mostly small, but locally gusty in places on lower slopes.	Strongest winds not necessarily higher terrain; in places suddenly very gusty through passes and to lower slopes.
How wet? (Precipitation and its impact)	Rain not expected	Rain not expected
Cloud on the hills?	Little if any Cloud banks briefly on some eastern slopes but most hills clear.	Risk fog banks morning in east Risk of low level fog extensive across east & mid-Wales from dawn, and patches in some western valleys. This may lift into banks of low cloud on eastern slopes for a time, gradually thinning and breaking. Higher tops likely above fog.
Chance of cloud free summits?	90%	80%
Sunshine? Air clarity (below cloud)	Mostly sunny. Visibility very good, low-level slight haze.	Sunshine and patches of cloud. Visibility excellent on most tops, but fog banks may affect eastern hills from low levels up for a few hours, leaving low-level haze.
How Cold? (at 900m)	10C, rising to locally 14C toward west coast; cooler on lower slopes at first.	Up to 12C near west coast, but some lower slopes cooler, particularly morning and in east, where if in fog only 7C.
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Thursday, 17 September, 2020**

Commonly dry through the weekend into early next week as high pressure resides across northern Britain. Mostly light winds, but occasionally gusty easterlies England & Wales late Friday into Saturday. Many mountains often clear, but areas of lingering low cloud will vary across Britain from day to day as wind direction fluctuates. Fairly warm by day overall, but cool in and around low cloud. Slight frost some nights, mainly Highland glens. Some low-level fog in mornings.

Forecast issued at 15:44 on Tuesday, 15 September, 2020

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2020.
