General Summary for Wednesday, 14 April, 2021

British Mountain Summary:

Based on forecast chart for noon 14 April, 2021

High pressure resides across Britain. Little wind overall. Very clear with a good amount of sun, but also some areas of cloud, which will produce one or two localised showers, these mostly just isolated flurries of hail or snow. Temperatures rising just above freezing point on many summits, except the very highest tops in Scotland.

Headline for Snowdonia National Park

Light winds. Risk showers. Hills mostly clear.

Detailed Forecast for Wednesday, 14 April, 2021

How windy? (On the summits)	Northeasterly, 5 to 10mph, locally 15mph toward dusk.
Effect of wind on you?	Small
How wet? (Precipitation and its impact)	Isolated showers Risk of an isolated shower, locally heavy with hail, or snow on higher slopes. Where these do form, they will move around slowly for an hour or so.
Cloud on the hills?	Little if any Fragments of cloud may briefly form on higher slopes in morning, otherwise most cloud which forms will be above the hills. Brief patches below 700m if showers occur.
Chance of cloud free summits?	90%
Sunshine? Air clarity (below cloud)	Periods of sunshine; cloud sometimes filling in, particularly inland by afternoon. Visibility excellent.
How Cold? (at 900m)	0C rising to 2C.
Freezing Level	Frost in some valleys and carries from dawn; then typically just above freezing to highest summits.

Snowdonia National Park - Looking Ahead

	Thursday 15 April	Friday 16 April
How windy? (On the summits)	Easterly 10 to 20mph	East or southeasterly 10mph, occasionally 15mph.
Effect of wind on you?	Fairly small	Small
How wet? (Precipitation and its impact)	Precipitation unlikely	Precipitation not expected
Cloud on the hills?	Generally clear	Little if any
Chance of cloud free summits?	Above 90%	90%
Sunshine? Air clarity (below cloud)	Sunshine extensive, a little fair-weather cloud filling in inland through day. Excellent visibility. Patchy fog some valleys after dawn.	Sunshine most widely morning, giving way as cloud gradually fills in inland. Visibility excellent. Pockets of mist some valleys at dawn.
How Cold? (at 900m)	Around 0C.	-1C rising toward 2C.
Freezing Level	Frost at dawn some valleys plus some sheltered higher ground; then typically 900-1000m	Frost in valleys and sheltered higher slopes at dawn; rising above freezing point on most higher summits.

Planning Outlook**All mountain areas of Britain from Thursday, 15 April, 2021**

High pressure is expected to influence our weather patterns beyond the middle of April. Often dry. Temperatures near freezing point on higher summits, tending to rise most afternoons. Lying snow on higher terrain will thaw only slowly. Some further overnight frosts. Next week may become milder with time. Sun and variable cloud; most mountains often clear. Mostly light winds, but southerlies strengthen this weekend. A frontal system coming in from the west by Sunday-Monday is likely to bring low cloud and some rain for a time, mainly in the west.

Forecast issued at 16:18 on Tuesday, 13 April, 2021

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2021.
