General Summary for Sunday, 29 May, 2022

British Mountain Summary:

Based on forecast chart for noon 29 May, 2022

Chilly northerly winds, mostly fairly light, will bring a few showers, of snow higher areas Scottish Highlands, but the risk of heavier showery rain to Wales - mainly South Wales. Patches of sun, although extensive cloud overall.

Headline for Snowdonia National Park

Light wind; patches of showery rain, mainly morning. Chilly.

Detailed Forecast for Sunday, 29 May, 2022

How windy? (On the summits)	Northerly 10mph; perhaps 15mph higher tops Snowdon range.
Effect of wind on you?	Negligible
How wet? (Precipitation and its impact)	Brief showers, mainly morning Threat over a couple of hours in morning of patches of showery rain drifting from north into mid Wales. Just a scattering of showers in the afternoon.
Cloud on the hills? Chance of cloud free summits?	Lifting to higher tops - may well all or nearly all clear afternoon Varied conditions in morning: some summits extensively cloud free, whilst other areas are often cloud covered as low as 600m. Cloud base will then rise; most or all summits clearing afternoon, although the cloud could come and go above 900m on Snowdon range. 30% morning; 80% afternoon
Sunshine? Air clarity (below cloud)	Patches of sun although overall extensive cloud. Through afternoon, slopes closest to the coast may well become sunny. Visibility excellent.
How Cold? (at 900m) Freezing Level	3C rising to 6C. Above the summits.

Snowdonia National Park - Looking Ahead

	Monday 30 May	Tuesday 31 May
How windy? (On the summits)	Westerly mostly 15mph.	Westerly 15mph.
Effect of wind on you?	Small	Small.
How wet? (Precipitation and its impact)	Showers, mainly well inland Scattered showers morning, most likely Snowdon range. Will gradually change as most showers become confined to more eastern hills whilst toward the coast rain becomes isolated.	Showers A few showers morning. For most areas will become dry through afternoon, initially on hills nearest the coast. However, watch for the possibility of a band (a few miles wide) of showery rain east from the Snowdon range.
Cloud on the hills?	Will clear many summits Cloud base will rise from 550 to 800m (lowest near coast) after dawn to or above 900m by late morning. But in rain, expect fog as low as 650m, temporarily lower.	Mostly clearing in the afternoon Overall, expect fog to cover higher areas in the morning, before gradually clearing at least to above 900m. However, in rain, patches of low cloud likely to form, locally below 500m.
Chance of cloud free summits?	70%	40%
Sunshine? Air clarity (below cloud)	Patches of sunshine. Very good visibility.	Patches of sun morning. During the afternoon sunshine may extend slowly inland from off the sea to the west. The air very clear.
How Cold? (at 900m)	4C.	4C
Freezing Level	Above the summits.	Above the summits

Planning Outlook**All mountain areas of Britain from Monday, 30 May, 2022**

Relatively low temperatures on the mountains until later in the week; particularly on the Scottish highlands where higher tops will frequently be near freezing point. Showers, some heavy and thundery, giving hail and on higher tops snow, will be widespread, particularly in the afternoons, when in some areas they will merge to give a few hours of precipitation with risk thunder. Signs of a few warmer drier days toward or into next weekend.

Forecast issued at 14:27 on Saturday, 28 May, 2022

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2022.
