## General Summary for Thursday, 10 November, 2022

### British Mountain Summary:

#### Based on forecast chart for noon 10 November, 2022

Difficult conditions on the mountains all day, severe gale or storm-force winds on higher terrain. Extensive low cloud shrouding hills, lowest in the west, with drizzly rain. More persistent and heavier rain at times in the northwest around Skye. Very mild air, but a marked wind chill where exposed on the hills.

### Headline for Snowdonia National Park

Severe upland gales. Drizzly rain and blanket hill fog.

## Detailed Forecast for Thursday, 10 November, 2022

<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Southwesterly 50 to 65mph. Over 70mph highest summits in Snowdon range. Most shelter near the Berwyn Mountains. A considerable increase of wind speed with height.  <b>Any mobility will be difficult.</b> <b>Gusts may blow you over on summits and through elevated passes.</b> <b>Significant wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Drizzly rain</b> Drizzle most persistent near the west coast, but on and off on most mountains which will feel very wet in the wind. Sometimes steadier rain. Significantly drier well to the east.
<b>Cloud on the hills?</b>   <b>Chance of cloud free summits?</b>	<b>Extensive</b> Cloud shrouding mountains from lower slopes up all day near the west coast. Slightly higher cloud base well inland, perhaps 400 to 600m, but summits likely to be in cloud all day.  <b>10%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Little or no sunshine. Hazy.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	8C Feeling -6C in the wind.  Above summits

## Snowdonia National Park - Looking Ahead

	Friday 11 November	Saturday 12 November
<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Southwesterly 40 to 60mph.  <b>Difficult conditions, general mobility very challenging at times. Strong gusts may blow you over. Significant wind chill.</b>	Southeasterly, 20 to 35mph; varied and very gusty, especially west of Snowdon, strongest winds not necessarily on highest <b>Fairly small some areas, but expect local buffeting gusts down to lower slopes and through passes.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Drizzly rain on and off</b> Small amounts in total, but expect drizzle or light rain, perhaps persistent, for a few hours Snowdon range westwards. Spots in the wind well inland, mostly dry furthest east.	<b>No rain</b>
<b>Cloud on the hills?</b>     <b>Chance of cloud free summits?</b>	<b>Extensive</b>  Cloud shrouding hills from lowest slopes, particularly coasts, widely from mid-slopes up Snowdon range. Higher cloud bases Carneddau and the Berwyn range, occasional breaks toward summits.  <b>20%</b>	<b>Early valley fog clearing</b>  Fog banks in valleys from dawn, the mountains likely clear above an inversion. May briefly drift onto lower slopes, mainly east Wales, but will all thin and break up during morning.  <b>90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Little or no sunshine, glimpses toward northeast Wales. Very hazy.	Misty start in valleys, but clearing to leave mostly sunny skies. Visibility excellent on mountains, perhaps low level haze.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	8C. Feeling around -6C in the wind.  Above the summits	9C or locally warmer some northern slopes. Feeling cooler where exposed to wind. Above the summits

## Planning Outlook

### All mountain areas of Britain from Friday, 11 November, 2022

Very mild southerly winds prevail. Prolonged rain later this week will make it very wet underfoot in western Scotland, particularly northwest, streams in spate and some flooding likely. Inversion conditions develop from the south into the weekend, leaving tops increasingly clear above early fog banks, initially just England & Wales on Saturday, extending into Scotland by Sunday. However, gusty winds will strengthen again, a risk of gales on Sunday, especially in the west. A front may encroach from the west later. Next week stays unsettled, potentially stormy at times. Frequent heavy rain and showers. Dropping near or below freezing on higher mountains, so intermittent snow and hail is likely on highest tops.

### Forecast issued at 16:10 on Wednesday, 9 November, 2022

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2022.
