**Planning Outlook**

**All mountain areas of Britain from Thursday, 4 April, 2024**

Complex areas of low pressure continue to circulate over Britain. Chilly easterly winds for Scotland through midweek, eventually turning southwesterly by the weekend with a rise of temperature by this stage. Risk of widespread upland gales Friday into the weekend. The western Highlands will generally see least precipitation and best cloud breaks. Eastern Scottish hills plus much of England and Wales more often affected by low cloud and periods of rain or hill snow. Fresh snow accumulations over the Highlands. England and especially Wales typically above freezing to tops.
