General Summary for Wednesday, 13 November, 2024

British Mountain Summary:

Based on forecast chart for noon 13 November, 2024

Mix of sun and often very low clouds covering the hills. In Highlands most sunshine afternoon, in Peak District and south Wales sunny most of the day. Southern Pennines and Lakes much sunnier than northern parts. Mild, light winds, chance for inversion conditions on the Munros.

Headline for Eryri / Snowdonia National Park

Cloudy north, sunny south, dry, breezy

Detailed Forecast for Wednesday, 13 November, 2024

How windy? (On the summits)	Northerly 20-25mph.
Effect of wind on you?	Fairly small.
How wet? (Precipitation and its impact)	Rain not expected
Cloud on the hills?	May form higher areas Snowdon range Most or all hills free of cloud at least first half of the day, later slowly cloudier. Cloud more frequent in the north, from morning hours progressively covering higher areas of Snowdon range - the Carneddau most at risk.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Sunny start, becoming progressively cloudier. Very good or excellent visibility, but misty or foggy some valleys, particularly morning.
How Cold? (at 900m)	5 to 8C.
Freezing Level	Above the summits. Local ground frost valleys at first.

	Thursday 14 November	Friday 15 November
How windy? (On the summits)	High uncertainty in forecast: North to easterly, 15 to 25mph.	Southwest to westerly, widely 15 to 25mph.
Effect of wind on you?	Fairly small.	Fairly small.
How wet? (Precipitation and its impact)	Little or no rain Chance for an odd spot of rain on northern hills.	Showers in the west Showers toward Llyn Pennisula and on hills near western coast. Toward east Wales dry.
Cloud on the hills?	Cloud patches various altitudes Patches of cloud on various levels, most densely covered northern hills of Snowdon and whole Carneddau. Breaks most likely toward the south. Possibly highest tops above cloud.	Extensive in the west, east mostly clear Hills covered down to lower slopes in the west. In east Wales cloud base much higher, tops in cloud but slopes below 600m often clear.
Chance of cloud free summits?	40%	50%
Sunshine? Air clarity (below cloud)	Often dull and murky, rare sun, most likely south. Very good visibility if not in cloud.	Mostly cloudy, but in central Wales chance for longer bright spells. These possible also on Carneddau. Away from the cloud visibility good.
How Cold? (at 900m)	4 to 7C, coldest east Wales	4 to 7C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook

All mountain areas of Britain from Thursday, 14 November, 2024

High pressure lasting until Friday, ending with a cold front coming from the northwest, what marks the end of fairly dry and mild period. On Saturday, the front will pass over Britain, reaching central England by the end of the day. bringing some rain to most hilly areas. Drastic cooling and big pressure drop behind the front. On Sunday and start of next week, in low pressure, frequent showers are expected, with snow on the hills, snowflakes even down to valleys and towns. In the Highlands snow may reach significant depths rapidly, meaning truly winter conditions fairly early in the season.

Forecast issued at 14:25 on Tuesday, 12 November, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
