General Summary for Thursday, 13 March, 2025

British Mountain Summary:

Based on forecast chart for noon 13 March, 2025

Chilly northerly winds, strongest over the Pennines, here bringing a scattering of mostly brief showers with hail and hill snow. Local areas of snow showers in northern Scotland too. Otherwise, largely dry, only isolated flurries and some sun, typically best in the morning. Evening into night, some snow develops from north for Highlands.

Headline for Eryri / Snowdonia National Park

Chilly wind. Largely dry, brief light showers.

Detailed Forecast for Thursday, 13 March, 2025

How windy? (On the summits)	Northerly 20 to 25mph.
Effect of wind on you?	Fairly small, but blustery in places around exposed higher edges; marked wind chill.
How wet? (Precipitation and its impact)	Brief flurries Often dry, but occasional flurries of soft hail or snow, mostly northern hills in morning, then one or two further south by afternoon. Mostly spots of rain lowest slopes.
Cloud on the hills?	Mostly confined to higher northern tops Yr Wyddfa to Carneddau: Patches of cloud likely to come and go above 750-900m. Elsewhere: cloud rare below 800m and frequently clearing the summits.
Chance of cloud free summits?	50% north, to 80% elsewhere
Sunshine? Air clarity (below cloud)	Bursts of sun north, bright sun elsewhere in morning, then patchy cloud and sun, best near Cardigan Bay. Excellent visibility.
How Cold? (at 900m)	-3C rising to -1C. In the wind, feeling like -8C.
Freezing Level	500m, tending to rise to 700m. Frost in valleys post dawn.

Eryri / Snowdonia National Park - Looking Ahead

	Friday 14 March	Saturday 15 March
How windy? (On the summits)	Northeasterly 15mph or less.	North to northeasterly 10 to 15mph, perhaps occasional 20mph highest tops.
Effect of wind on you?	Mostly negligible.	Mostly small
How wet? (Precipitation and its impact)	Showers, snow or soft hail Showery sleet/snow in the morning, risk of hail. Scattered showers of snow and soft hail inland afternoon.	Precipitation unlikely
Cloud on the hills?	Mostly clear Cloud occasionally will cap high tops. Lowest bases in the east, rarely reaching below 900m.	Most cloud above the hills Rare patches may graze highest tops in Carneddau area in the morning.
Chance of cloud free summits?	70%	80%
Sunshine? Air clarity (below cloud)	Glimpses of sun at first, more frequent bursts later. Excellent visibility out of precipitation.	Patchwork of sun and cloud; sunshine best toward west. Visibility excellent.
How Cold? (at 900m)	-1C, some slight warming by afternoon.	-1C rising to +1C afternoon.
Freezing Level	All terrain frozen in the morning, frost into valleys. Rising to 900m.	500m rising to 900m or just above into afternoon. But also frost widely in valleys and sheltered lower slopes from dawn.

Planning Outlook**All mountain areas of Britain from Friday, 14 March, 2025**

Staying cold through the weekend into the start of next week, with frost overnight to lower slopes and valleys, then during the daytimes the freezing level lifting onto higher slopes. Higher pressure expands across all areas from the north, bringing largely dry conditions and rare brief light showers. A largely fine weekend ahead with light winds, sunny spells, variable cloud, and very clear crisp air. Some showers may run into northern Scotland on stronger winds here. Next week, a gradual shift back to less cold southeasterlies, with some showery rain developing from midweek, possibly more widespread spells of rain and some hill snow later in the week.

Forecast issued at 16:00 on Wednesday, 12 March, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
