How Cold? (at 900m)	5C rising to 7C.	
Freezing Level	Above the summits	

#### MOUNTAIN WEATHER INFORMATION SERVICE

#### Eryri / Snowdonia National Park - Looking Ahead

	Friday 25 April	Saturday 26 April
How windy? (On the summits)  Effect of wind on you?	South or southeasterly 20-25mph, gusty 30mph in places toward and west of Snowdon group.  Higher winds starting to affect comfortable walking. Some sudden buffeting gusts around Snowdon and	Southerly 15mph, to occasional 20mph higher tops.  Mostly small
How wet?	west. Occasional rain, risk wetter later	A little rain, risk a showery burst
(Precipitation and its impact)	Patchy rain throughout the day. Some more persistent rain possible at times toward Llyn peninsula. Greater risk of more widely persistent rain toward evening, may become heavier from dusk.	Rain from overnight may leave a little drizzly rain into the morning.  Likely fading out, but possible local bursts of rain forming mostly inland in afternoon.
Cloud on the hills?	Lowering in west in rain	Fairly extensive, rising slowly
	Patchy cloud banks likely to come and go over higher slopes, more persistent in west. Best breaks to tops toward Carneddau. Lowering to 600m near and west of Snowdon in rain.	Widely covering the hills in the morning, banks at various heights, in places to lower slopes toward west. Gradually lifting to upper slopes, some breaks forming, soonest near/north from Ogwen valley.
Chance of cloud free summits?	60%	30%
Sunshine? Air clarity (below cloud)	Little or no sun. Visibility good when dry, but reducing in rain, later poor.	Glimpses of sun mainly afternoon.  Misty, murky start widely, visibility slowly improving to become good below cloud.
How Cold? (at 900m)	5C. Feeling near -5C in strongest winds.	6C
Freezing Level	Above the summits	Above the summits

## **Planning Outlook**

### All mountain areas of Britain from Friday, 25 April, 2025

Weak fronts will encroach from the Atlantic by Friday into the weekend, bringing more humid air, with low cloud and patchy rain or drizzle, local showery bursts. Possibility of more persistent rain in western Scotland by Sunday with stronger southwesterly winds for a time. Generally mild, or increasingly warm into early next week as southerly air prevails. High pressure rebuilding with a good deal of dry and sunny weather expected next week into the start of May.
