Freezing Level	Above the summits, but at dawn frost some upland and lowland valleys.

All mountain areas of Britain from Wednesday, 7 May, 2025

A quiet spell of weather as high pressure continues to dominate over the British Isles this week and very possibly well into next week too. Generally dry conditions, low risk of an isolated afternoon shower. Winds mostly light, direction variable. Chilly nights with frost in valleys and sheltered higher terrain. Becoming pleasantly warm into the afternoons. Sunshine and variable cloud, at times covering the sky, but generally above the mountain tops with excellent visibility. Very dry ground conditions, beware high risk of fire.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
