General Summary for Monday, 16 June, 2025

British Mountain Summary:

Based on forecast chart for noon 16 June, 2025

A front draped over the Highlands brings low cloud and drizzly rain to western areas, heavier rain pushing northwards in the afternoon. Southwesterly winds will strengthen later in Scotland, becoming gales on higher mountains by evening. Dry with sunny spells and cloud clearing the tops in England & Wales.

Headline for Eryri / Snowdonia National Park

Light-moderate breeze until later. Early low cloud largely clearing.

Detailed Forecast for Monday, 16 June, 2025

How windy? (On the summits)	West then southwesterly, 15 to 20mph, tending to increase toward evening and into night to 25-30mph.
Effect of wind on you?	Small most of day, starting to feel more blustery toward dusk, affecting balance on exposed ridges.
How wet? (Precipitation and its impact)	Rain unlikely Possibly a little fine misty drizzle in cloud near to coast in morning.
Cloud on the hills? Chance of cloud free summits?	Low cloud mostly breaking up Cloud banks above 500-600m in the morning, mostly western areas; patchier and more broken north/east of the A5; high tops may be near top of fog layer. Tending to lift, thin and disperse, slowest to clear on slopes toward Cardigan Bay, patches may linger. 40% rising to 80%
Sunshine? Air clarity (below cloud)	Variable cloud in morning, misty toward coastal slopes, improving to a patchwork of cloud and sun, very good visibility.
How Cold? (at 900m) Freezing Level	11C rising to 13C. Above the summits.

Eryri / Snowdonia National Park - Looking Ahead

	Tuesday 17 June	Wednesday 18 June
How windy? (On the summits)	West to southwesterly 20 to 25mph, may drop less during afternoon.	Westerly 10-15mph.
Effect of wind on you?	Fairly small, but feeling breezy on exposed tops, may start to affect balance on ridges; becoming less with time.	Small
How wet? (Precipitation and its impact)	Drizzly rain develops Patchy drizzle on western hills becoming more persistent for a time middle of day into afternoon as a weakening front comes in from the north, fading later.	Rain not expected
Cloud on the hills?	Fairly extensive, lowest western hills Risk covering higher areas most of the day, lowest cloud bases toward west coast when rain occurs, from 500-600m upward or brief lower patches. Higher bases Carneddau and Berwyn groups.	Possible patchy cloud or coastal fog Patchy cloud banks drifting onto some coastal slopes, may be fog on lower slopes for a time. Tending to all thin and disperse, though a chance of fog lingering right along the Cardigan Bay coastline.
Chance of cloud free summits?	30%	80%
Sunshine? Air clarity (below cloud)	Fairly cloudy and some haze west. Glimpses of sun, visibility good further inland and east where below cloud.	Mostly sunny, some fair-weather cloud. Visibility very good, but possibly misty near to the sea.
How Cold? (at 900m)	10C, quite humid.	10C rising to 14C.
Freezing Level	Above the summits	Above the summits

Planning Outlook**All mountain areas of Britain from Tuesday, 17 June, 2025**

Humid southwesterly winds early this week brings low cloud and spells of drizzly rain to western hills. High pressure to the south will tend to expand northwards during midweek, with dry conditions and warm air for all regions, sunshine and fair-weather cloud. Winds becoming light south to southeasterlies later in the week. Uncertainty by next weekend into early the following week, a risk of some rain or showers returning as pressure tends to fall.

Forecast issued at 16:00 on Sunday, 15 June, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
