## General Summary for Monday, 29 September, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 29 September, 2025

Scotland: Southwesterly winds with a warm front bringing cloud and patchy rain into afternoon for western hills. Eastern hills substantially clear with morning sunshine.

England/Wales: Sunshine giving way to veil of cloud, with will lower onto higher western tops with local drizzle. Dry elsewhere.

### Headline for Eryri / Snowdonia National Park

Sunny start, but some fog banks. Clouding over afternoon, cloud onto tops.

## Detailed Forecast for Monday, 29 September, 2025

<b>How windy? (On the summits)</b>	Variable 10mph or less. Trending southwesterly and rising towards 15mph late in the day, some gustiness.
<b>Effect of wind on you?</b>	<b>Negligible</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Substantially dry</b> Some fine drizzle drifting around high slopes from Snowdon and south at times. Dry to the north and east.
<b>Cloud on the hills?</b>	<b>Mostly high terrain of Snowdon group</b> From dawn, valley mist and ragged cloud patches south and west Glyder Fawr. Cloud will build on high terrain of Snowdon group towards Llyn Peninsula occasionally forming downslope towards Cardigan bay.
<b>Chance of cloud free summits?</b>	<b>70% lowering to 40% later in the day</b>
<b>Sunshine?</b> Air clarity (below cloud)	Morning sunshine gradually shrouded by high cloud through afternoon. Very good visibility, some haze mid-Wales.
<b>How Cold? (at 900m)</b>	7C rising to 8C later in the day.
<b>Freezing Level</b>	Above the summits

## Eryri / Snowdonia National Park - Looking Ahead

	<b>Tuesday 30 September</b>	<b>Wednesday 1 October</b>
<b>How windy? (On the summits)</b>	South to southwesterly, 15 to 20mph, occasionally 25mph higher terrain.	South to south-westerly 15 to 30mph.
<b>Effect of wind on you?</b>	<b>Fairly small, but may start to affect balance on exposed ridges.</b>	<b>Blustery at times with a marked wind chill over the tops.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Damp at times in west</b> A little rain or drizzle, most common on hills nearest Cardigan Bay and on Llyn peninsula. Further north/east largely dry.	<b>Patchy drizzle, mainly in the west</b> Patches of drizzle from the low cloud, most of which will be across western ranges. Very little if any east Wales.
<b>Cloud on the hills?</b>	<b>Extensive west coast hills</b>  Low cloud likely to shroud hills toward west, from some lower elevations upward nearest coast for periods. Higher bases toward and north of Ogwen, breaks above 700m. Also clearer Berwyn group.	<b>Extensive across western mountains</b>  Extensive hill fog throughout the day, bases varying but often around 500-700m. Elsewhere across east Wales, cloud rare below 800m.
<b>Chance of cloud free summits?</b>	<b>20%</b>	<b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Overcast, glimpses of sun mainly northeastern areas. Visibility poor where damp, better inland and toward north, good below cloud.	A little weak sun may come through a veil of cloud at times, mainly east Wales. Visibility sometimes poor due to rain.
<b>How Cold? (at 900m)</b>	8C, little change all day where in cloud, clearer spots rising to 10C.	9C
<b>Freezing Level</b>	Above the summits	Above the summits

**Planning Outlook****All mountain areas of Britain from Tuesday, 30 September, 2025**

Next week the UK is situated under a boundary between high and low pressure with a trend towards more settled conditions in the south, unsettled in the north. Northwest England and west Scotland could be rather wet with a southwesterly wind pushing cloud and spells of rain onto western hills. Several more organized frontal systems are likely to pass into eastern Scotland as well. Generally dry for the Pennines and Wales, though cloud and occasionally drizzly rain will impact western areas, notably Lakeland and Snowdonia. Sun breaks likely in England but short-lived. First indications of more widely unsettled weather into next weekend as a deeper area of low pressure passes north, though confidence remains low regarding timing and strength.

**Forecast issued at 16:30 on Sunday, 28 September, 2025**
