Mostly light wind during day. Dry with sunshine, high cloud.

Detailed Forecast for Friday, 21 November, 2025

How windy? (On the summits)	North-northwest turning west later southwesterly, 15 to 20mph at first, soon dropping to 10mph or less for a few hours, increasing afternoon to 20mph up to dusk, into night eventually to 40-50mph.
Effect of wind on you?	Mostly small during daytime, then feeling more blustery up to dusk, deteriorating into the night.
How wet? (Precipitation and its impact)	Generally dry until midnight A covering of snow over snow mountains, mostly north & east hills. Chance an odd early flurry near coast, but most or all daytime dry. Into night, rain developing from west, snow on higher terrain for a time.
Cloud on the hills?	Little if any Hills largely clear all day. Into afternoon, some patches may form on slopes near west coast.
Chance of cloud free summits?	80%
Sunshine? Air clarity (below cloud)	Sun through high cloud, tending to thicken from west, may become obscured later. Visibility excellent, possible mist or haze in some valleys.
How Cold? (at 900m)	-2C, slight rise toward 0C afternoon, then just above into night. If wind increases, feeling near -10C later.
Freezing Level	Terrain widely frozen inland in morning, all day out of sunlight. Near coast up to 700m, then into night widely just above freezing to upper slopes.

All mountain areas of Britain from Saturday, 22 November, 2025

Changes into the weekend as less cold Atlantic air moves in, but higher mountain terrain at least in Scotland staying frozen with snow cover. A complex area of low pressure circulates over Britain through the weekend, retreating to leave briefly northeasterly winds by Monday; areas of rain and some upland snow, mainly Scotland and high tops in northern England. Winds will vary markedly, some lulls, but risk periods of gales. A brief ridge of high pressure gives a lull by Tuesday, then a shift to milder southwesterlies is likely to bring spells of rain and some thawing to higher levels.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
