## General Summary for Thursday, 15 January, 2026

### British Mountain Summary:

**Based on forecast chart for noon 15 January, 2026**

Blustery and chilly south-westerly winds bringing occasional snow and hail showers, most prevalent across the west Highlands. Rain falling below 500m. Drier for England and Wales, but risk of marked deterioration later for southern and eastern Wales as rain and summit snow edges in from the south.

### Headline for Eryri / Snowdonia National Park

Blustery with showers. Persistent rain and summit snow may arrive later in east.

## Detailed Forecast for Thursday, 15 January, 2026

<b>How windy? (On the summits)</b>	South to southwesterly 25mph at dawn, then easing down to give a pronounced lull before an easterly develops toward or after dusk, 30mph.
<b>Effect of wind on you?</b>	<b>Mostly fairly small.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Risk showers</b> Chance showers morning west Wales, snow tops, but fading. Also risk persistent rain late in day (snow higher slopes), mainly east Wales and into mid Wales.
<b>Cloud on the hills?</b>	<b>May well clear most summits</b> Cloud base likely to lift toward 900m widely, possibly sometimes clearing higher tops. Risk though in precipitation later of cloud filling in extensively across the hills, mainly eastern areas.
<b>Chance of cloud free summits?</b>	<b>70%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patches of sunshine - may give way to thickening cloud. Visibility excellent but very poor in precipitation.
<b>How Cold? (at 900m)</b>	0 or 1C
<b>Freezing Level</b>	900 or 1000m.

	Friday 16 January	Saturday 17 January
<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Low confidence in detail: Southwesterly backing southerly 25 to 40mph, steady rise through day, strongest by dusk.  <b>Be prepared for increasingly blustery or even arduous conditions to develop, after perhaps a lull in the morning.</b>	South-easterly 15 to 25mph, but perhaps up to 30mph up the west coast and some tops inland.  <b>Mostly small, but wind chill still significant where exposed to the strongest wind.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Scattered showers</b> Scattered showers moving in from the southwest, snow above 800m, hail at times to lower slopes.	<b>Often dry, but patchy rain possible.</b> Occasional showers or patches of rain.
<b>Cloud on the hills?</b>	<b>Fairly extensive, best breaks north.</b>  Cloud very likely fairly extensive across upper slopes. Best breaks across northern most tops. General bases around 600-800m.	<b>Varied banks of low cloud</b>  Varied low cloud across the area. Banks of patches from mid to upper slopes, perhaps fairly extensive in coverage. Best breaks toward the west coast.
<b>Chance of cloud free summits?</b>	<b>30%</b>	<b>30%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Little or no sun.  Visibility good or very good away from showers.	Mostly overcast. Rather hazy with poor visibility where patches of rain occur.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	0C  900m	2 or 3C, small rate of change in temperature with height. Feeling closer to -5C in the strongest wind.  Above the summits

## Planning Outlook

**All mountain areas of Britain from Friday, 16 January, 2026**

A small scale low will pull away early on Friday morning to the North Sea to leave drier and chilly conditions into the weekend with a south to south-easterly airflow developing. Looking further ahead, a colder continental influence may be drawn in on south to east winds, but the extent of this is uncertain. The snow pack across the Scottish Highlands will be enhanced by further spells of snowfall where where fronts edge in from the west, whilst for England and Wales snow accumulating on the hills at times, perhaps in the form of showers from the east.

**Forecast issued at 16:46 on Wednesday, 14 January, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
