## Detailed Forecast for Saturday, 7 February, 2026

<b>How windy? (On the summits)</b>	South-easterly 15 to 25mph, but perhaps lifting to 30mph east Wales and into mid Wales.
<b>Effect of wind on you?</b>	<b>Increasingly blustery across hills in east Wales down to mid Wales. Otherwise, mostly small.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Showery</b> Showers, particularly W Wales - risk that the rain may be almost constant for an hour or two.
<b>Cloud on the hills?</b>	<b>Extensive, lowest east Wales.</b> Extensive low cloud across the hills, widely to mid slopes across east Wales, but more generally around 800-1000m toward the west coast.
<b>Chance of cloud free summits?</b>	<b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Very little if any sun. General haze, best visibility near west coast.
<b>How Cold? (at 900m)</b>	1C, lifting to plus 3C
<b>Freezing Level</b>	1000m, but soon above highest summits.

## Eryri / Snowdonia National Park - Looking Ahead

	Sunday 8 February	Monday 9 February
<b>How windy? (On the summits)</b>	Southerly typically 15 to 20mph possibly 25mph at times.	South-easterly 20 to 30mph, perhaps 35-40mph at times western coastal hills.
<b>Effect of wind on you?</b>	<b>Mostly small</b>	<b>Blustery and gusty for periods, especially western coastal hills, where perhaps fairly arduous. Considerable wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Showers</b> Rain now and again, particularly afternoon falling as heavy showers. Risk hail.	<b>Patches or spots of rain here and there</b> Within an overcast environment, here and there patches, or occasional spots, of rain, particularly southern and eastern areas.
<b>Cloud on the hills?</b>	<b>Extensive on higher slopes.</b>  Cloud base typically 600 to 800m, rare breaks to higher tops, but nearer 300m in rain.	<b>Extensive, best breaks west coast.</b>  Extensive low cloud covering the hills. Widely mid to lower slopes east Wales. Higher bases Snowdon and west coast, where mostly confined above 800m.
<b>Chance of cloud free summits?</b>	<b>Less than 10%</b>	<b>20%, but 50% toward west coast.</b>
<b>Sunshine?</b> Air clarity (below cloud)	Occasional sunshine; visibility very good, but poor in rain.	Overcast.  General haze, extensive areas of mist and murk.
<b>How Cold? (at 900m)</b>	2C	2C
<b>Freezing Level</b>	Above the summits.	Above the summits

## Planning Outlook

### All mountain areas of Britain from Sunday, 8 February, 2026

Overall little change in conditions over the coming week: the mountains extensively foggy, precipitation from time to time (again concentrated on eastern Scotland and southern and eastern Wales) and often strong southeast or easterly wind. However, a slight rise in temperature will result in thawing of lying snow from southern Scotland southwards and some thawing up to around 900, sometimes 1050m Scottish Highlands - although the return of low freezing level toward the middle of next week.

### Forecast issued at 15:01 on Friday, 6 February, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
