General Summary for Monday, 30 March, 2026

British Mountain Summary:

Based on forecast chart for noon 30 March, 2026

Gale-force west-northwesterlies, severe over higher Scottish mountains toward the north, squally gusts around showers of snow, also hail toward north early in the day. Light showers of rain or upland snow tending to fade with time, some breaks in cloud forming, best eastwards.

Headline for Eryri / Snowdonia National Park

Windy, gales in morning. Light showers fade, cloud breaks.

Detailed Forecast for Monday, 30 March, 2026

How windy? (On the summits)	Northwesterly 30 to 40mph, strongest in the morning, gusts 50mph for a time higher mountains.
Effect of wind on you?	Strenuous walking conditions, frequent buffeting in exposure, balance difficult on ridges. Considerable wind chill.
How wet? (Precipitation and its impact)	Light showers for a time An odd light shower or snow flurry over hills above 600m in morning, fading out.
Cloud on the hills?	Lifting to higher tops, breaks form Cloud banks drifting over higher slopes, mostly above 600-700m in morning, tending to rise. Patches come and go on high western tops, increasing breaks. Will then lower from west into night.
Chance of cloud free summits?	60% rising to 80% inland
Sunshine? Air clarity (below cloud)	Occasional sun, most common east. Visibility mostly good, slight haze.
How Cold? (at 900m)	0C rising to 3C by late afternoon, then higher after dark. Wind chill feeling like -10 to -13C.
Freezing Level	900-1000m from dawn, rising above highest summits during middle of day.

Eryri / Snowdonia National Park - Looking Ahead

	Tuesday 31 March	Wednesday 1 April
How windy? (On the summits)	Westerly, 20 to 25mph, in places gusty 30mph around higher tops.	West to southwesterly 15 to 25mph, may strengthen with time from north.
Effect of wind on you?	Fairly small, but gusty areas may start to affect balance on exposed ridges, feeling quite chilly despite milder air.	Fairly small, but may start to feel more noticeable and gusts affecting balance on exposed ridges.
How wet? (Precipitation and its impact)	Drizzly rain, fading during day Drizzle and light rain most persistent and widespread during the morning. Tending to fade, but patchy drizzle may linger near west coast, feeling generally damp where within cloud, making rock surfaces slippery.	Little if any rain until late Chance of odd drizzly showers. Later in the day, greater risk of patchy rain developing from the northwest.
Cloud on the hills?	Extensive, then rising and breaking Blanket low cloud across the hills in the morning, from lower elevations up in west, 400-500m inland. Tending to rise to 600-700m, breaks gradually forming, but banks likely come and go on high western tops.	Covering higher slopes most often west Cloud banks over higher tops, most frequent or persistent toward Cardigan Bay above 600-800m. Mostly above 800m by mid-morning near and east of A5 corridor.
Chance of cloud free summits?	Below 10%, rising to 40% afternoon.	30%
Sunshine? Air clarity (below cloud)	Cloudy and misty, some brighter moments emerge with time inland, perhaps more widely afternoon, visibility becoming good where cloud lifts and breaks.	Fairly cloudy, occasional sun mostly east Wales. Visibility good below cloud.
How Cold? (at 900m)	4 or 5C. Feeling like -3 to -5C directly in the wind.	4C. Feeling nearer -4C if exposed to wind.
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Tuesday, 31 March, 2026**

A drop of temperature is expected again across Scotland during Wednesday as a band of rain then upland snow drifts slowly southwards. Atlantic weather patterns and west-southwesterly winds likely continue into the start of the Easter period at least, a risk of further gales over the mountains. Temperature may remain variable, possibly often cold over the mountains with snow and hail showers at times to lower elevations at least in Scotland, sometimes more widely, mixed with some spells of rain - precipitation generally most frequent west and northwest. Some windows of drier and brighter conditions, but day-to-day detail is uncertain.

Forecast issued at 16:00 on Sunday, 29 March, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
