General Summary for Monday, 2 November, 2026

British Mountain Summary:
Based on forecast chart for noon 2 November, 2026

Light winds for much of the Highlands; a stronger northeasterly breeze for England & Wales, particularly toward the south, feeling chilly. Generally dry, sunshine best in southern Scotland and toward the Irish Sea coast. Some cloud banks in northern Scotland, but high mountains may poke out above this.

Headline for Eryri / Snowdonia National Park

Breezy, sunshine, patchy cloud, hills mostly clear.

Detailed Forecast for Monday, 2 November, 2026

How windy? (On the summits)	Northeasterly 20 to 25mph, gusty in places around high tops and passes, 30mph at times, speeds tending to rise a little.
Effect of wind on you?	**Feeling noticeably breezy and chilly on high terrain. Ease of walking more affected locally in gusty areas.**
How wet? (Precipitation and its impact)	**Rain not expected**
Cloud on the hills?	**Mostly little** Occasional patches grazing higher slopes mostly Carneddau, also Bala-Berwyn groups early in day, but often clear all day toward west coast.
Chance of cloud free summits?	**70% northeast, to 90% west.**
Sunshine? Air clarity (below cloud)	Patchwork of sun, best in west. Visibility very good, some haze lower down.
How Cold? (at 900m)	2 to 4C. Feeling nearer -5C directly in wind.
Freezing Level	Above the summits, but patchy frost in valleys at first, also some sheltered higher slopes.

Eryri / Snowdonia National Park - Looking Ahead

	Tuesday 3 November	Wednesday 4 November
How windy? (On the summits) **Effect of wind on you?**	East to northeasterly 20 to 30mph, some stronger gusts locally around high tops and elevated passes. **Starting to affect comfortable walking on exposed terrain and some more noticeable gustiness affecting balance. Feeling chilly.**	Easterly 25 to 40mph, very gusty in places around some tops, elevated passes and locally down western slopes. **Affecting comfortable walking on higher slopes, buffeting gusts in places making balance tricky. Considerable wind chill.**
How wet? (Precipitation and its impact)	**Rare drizzle** Odd patches of drizzle mostly east and northeastern hills, very little if any toward west coast.	**Largely dry** Spots of light rain in the wind at times, mainly eastern hills.
Cloud on the hills? **Chance of cloud free summits?**	**Most persistent east/northeast tops** Cloud banks drifting over higher slopes mostly from Carneddau to Bala and Berwyn groups, base around 700m; tends to thin a little during day. Best breaks westwards and coastal hills clearer. **70% near W coast, to 30% E/NE.**	**Rare patches** Grazing higher eastern slopes occasionally, mostly above 700m, but well broken westwards, often lifting higher. **80%**
Sunshine? Air clarity (below cloud)	Fairly cloudy, occasional sun breaking through, sunnier toward west coast. Visibility very good out of cloud.	Sunshine best west, patchy cloud east. Visibility good, though some haze especially eastern areas.
How Cold? (at 900m) **Freezing Level**	4C, little change all day. Feeling like -5C directly in the wind. Above the summits.	2C. Feeling like -7 to -10C directly in the wind. Close to freezing on highest summits.

Planning Outlook

All mountain areas of Britain from Tuesday, 3 November, 2026

A settled week ahead as high pressure resides toward the north. Easterly winds will prevail, strongest for Wales and the southern Pennines. Largely dry weather, whilst variable cloud will be drawn in from the North Sea, at times some light showers in eastern areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows; then cooler toward the weekend on tops. Quiet weather also likely as next weekend begins, perhaps further ahead, though a mixed Atlantic influence may return to Scotland.

Forecast issued at 16:00 on Sunday, 1 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
