General Summary for Thursday, 17 September, 2020

British Mountain Summary:

Based on forecast chart for noon 17 September, 2020

High pressure brings a quiet day with mostly light winds, although an easterly breeze affects Wales and the Peak District, plus a locally gusty southwesterly in NW Scotland - here low cloud and a little rain on coastal hills. Otherwise hills clear, patchy fog soon clearing.

Headline for Southeastern Highlands

Dry, hills clear, low-level fog clearing. Light winds.

Detailed Forecast for Thursday, 17 September, 2020

How windy? (On the Munros)	South to southwesterly, 5-10mph or less.
Effect of wind on you?	Negligible
How wet? (Precipitation and its impact)	Rain not expected
Cloud on the hills?	Little if any Local low-level fog patches from dawn, and cloud banks briefly on some slopes. Otherwise most hills clear.
Chance of cloud free Munros?	90%
Sunshine? Air clarity (below cloud)	Mostly sunny. Visibility excellent; early fog patches in or just above some glens leaving slight low-level haze.
How Cold? (at 900m)	10 to 12C; small variation night into day.
Freezing Level	Above the summits; grass frost some glens at dawn.

Southeastern Highlands - Looking Ahead

	Friday 18 September	Saturday 19 September
How windy? (On the Munros)	Variable 5-10mph or less.	Direction varied, 10mph or less, sometimes windless. Perhaps easterly 15mph hills nearest central belt.
Effect of wind on you?	Negligible	Negligible
How wet? (Precipitation and its impact)	Rain unlikely	Rain unlikely
Cloud on the hills?	Little if any Patchy low level fog or local cloud banks from dawn. Otherwise the mountains generally clear. Into the night, a risk of fog filling in from the east to low levels.	Mostly very little Local banks of low level cloud may linger for a few hours, with higher slopes above or between cloud layers. Many hills often free of cloud.
Chance of cloud free Munros?	90%	70%
Sunshine? Air clarity (below cloud)	Sun weak at times due to layers of high cloud, sometimes clouding over. Visibility very good, but may become dull. Mist some glens post-dawn.	Sunshine and occasional cloud filling in. Visibility very good.
How Cold? (at 900m)	10 to 12C with little change night into day; hills warmer than glens post-dawn.	Staying around 10C, but locally a degree or so higher by afternoon; cooler in the glens post-dawn.
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Friday, 18 September, 2020**

Commonly dry through the weekend into early next week as high pressure resides across northern Britain. Mostly light winds in Scotland, but gusty easterlies England & Wales into the weekend. Many mountains often clear, but areas of lingering low cloud will vary across Britain from day to day. Fairly warm by day overall, but cool in and around low cloud. Slight frost some nights, mainly Highland glens. Some low-level fog in mornings. A shift back to southwesterlies and frontal systems moving in from the Atlantic through next week.

Forecast issued at 15:28 on Wednesday, 16 September, 2020
