General Summary for Wednesday, 15 September, 2021

British Mountain Summary:

Based on forecast chart for noon 15 September, 2021

Light wind across the country. However, in a fairly humid air mass - with a weak front reaching western Scotland - low cloud will be extensive at first although many summits will clear. Here and there showers, but rain on and off near Loch Linnhe and coastal NW Highlands.

Headline for Southeastern Highlands

Light wind; a few showers. Low cloud mostly clearing.

Detailed Forecast for Wednesday, 15 September, 2021

| | |
|--|---|
| How windy? (On the Munros) | Direction varied 10mph or less. |
| Effect of wind on you? | Negligible |
| How wet? (Precipitation and its impact) | Isolated bursts of rain Frequently or completely dry. However, a few bursts of showery rain, mainly afternoon, most likely north Perthshire. |
| Cloud on the hills? | Becoming confined to higher tops Post dawn, patches of fog, from lower slopes up. By late morning mostly cloud above 1050m and may then clear higher tops for periods. However, in rain, patches may re-form down to around 650m. |
| Chance of cloud free Munros? | 70% |
| Sunshine? Air clarity (below cloud) | Patches of sunshine, although extensive cloud overall. Very good visibility by late morning. |
| How Cold? (at 900m) | 9C |
| Freezing Level | Above the summits |

Southeastern Highlands - Looking Ahead

| | Thursday 16 September | Friday 17 September |
|---|--|--|
| How windy? (On the Munros) Effect of wind on you? | West later southwesterly 10-15mph. Mostly negligible. | Southerly 30 to 40mph post dawn. Will later veer westerly and drop to 20mph, perhaps little wind at all by dusk. Significant buffering on higher areas, but likely to become small or negligible. |
| How wet? (Precipitation and its impact) | Rain not expected | Occasional rain Very likely dry at first, and perhaps most of the day Ochils and near and east of Glenshee. However, rain will spread slowly east. most persistent west of A9. |
| Cloud on the hills? Chance of cloud free Munros? | Clearing most tops intermittently Widespread cloud higher areas from dawn above 800m. The base will rise to typically 1050m allowing most tops to clear for periods. 60% | Forming extensively in rain Cloud shrouding higher areas from Ben Alder east to southern summits in Cairngorms NP most or all day; typical base 700m. Elsewhere, summits often cloud free, although in and after rain, patches likely above about 850m. 30% |
| Sunshine? Air clarity (below cloud) | Occasional sun - most sun Angus. Excellent visibility. | Pockets of sunshine here and there, mainly Angus. Hazy. |
| How Cold? (at 900m) Freezing Level | 9C Above the summits. | 10C Above the summits. |

Planning Outlook

All mountain areas of Britain from Thursday, 16 September, 2021

On Friday, a weakening Atlantic front will bring in rain (mainly to the W & NW Highlands), and stronger winds to western mountains.

As yet detailed confidence not high for the weekend and early next week. There will be a build of pressure following Friday's rain to give substantially fine weather, but the remnants of fronts may still give one or two 'poor' periods, with low cloud and occasional rain.

Forecast issued at 7:29 on Wednesday, 15 September, 2021
