## General Summary for Tuesday, 16 July, 2024

### British Mountain Summary:

**Based on forecast chart for noon 16 July, 2024**

Areas of thundery rain, concentrated over central and eastern Britain, together with areas of low cloud. Some uncertainty as to the western limit of the rain, but overall western mountains will have only a few showers - with the trend for the improved conditions to extend slowly east through the day.

### Headline for Southeastern Highlands

Areas of showery rain, becoming confined to eastern summits.

## Detailed Forecast for Tuesday, 16 July, 2024

<b>How windy? (On the Munros)</b>	Very little wind from dawn. Through morning becoming westerly 10mph, and possibly 15mph afternoon.
<b>Effect of wind on you?</b>	<b>Negligible</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Showery rain, some heavy - tending to clear from west</b> Patches of rain, in places heavy with low risk thunder, may be fairly extensive from dawn. By midday, probably confined east of the A9. By late afternoon, the rain may be confined near and east of Glenshee.
<b>Cloud on the hills?</b>	<b>Will vary considerably: forming extensively in rain.</b> Particularly west of A9, summits may well become cloud free for most of the day, although patches in and following rain. Elsewhere, again, some higher summits may clear for periods, but in and after rain, even some lower slopes may be foggy.
<b>Chance of cloud free Munros?</b>	<b>40%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Occasional sun: tending to become sunnier from west particularly near and west of A9. Poor visibility in heavy rain, but otherwise, excellent or superb.
<b>How Cold? (at 900m)</b>	11C.
<b>Freezing Level</b>	Above the summits.

## Southeastern Highlands - Looking Ahead

	Wednesday 17 July	Thursday 18 July
<b>How windy? (On the Munros)</b>	Southerly 10 to 15mph, perhaps 20mph for a time.	Southwesterly 20 to perhaps 25mph. Will tend to drop, perhaps later markedly.
<b>Effect of wind on you?</b>	<b>Small.</b>	<b>Mostly fairly small.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain unlikely</b> Risk of scattered 'passing' showers.	<b>Rain from time to time</b> Rain now and again, mainly near and west of Glenshee.
<b>Cloud on the hills?</b>	<b>Summits extensively cloud free.</b>  Patchy cloud in the morning will mostly all clear, only leaving the odd patch on higher ground (most likely highest tops from Ben Lawyers to Bn Alder).	<b>Extensive most areas; but perhaps mostly cloud free Ochils &amp; Angus.</b>  Cloud frequently above 600 to 800m, and mainly west of A9, patches sometimes nearer 450m.
<b>Chance of cloud free Munros?</b>	<b>Becoming 80%</b>	<b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Widespread weak sunshine in the morning fading as high-level cloud thickens through the afternoon. Excellent visibility.	Generally dull and in some areas misty. The sun may break through here and there.
<b>How Cold? (at 900m)</b>	9C around midday. A couple of degrees warmer by early evening.	11C
<b>Freezing Level</b>	Above the summits.	Above the summits.

**Planning Outlook****All mountain areas of Britain from Wednesday, 17 July, 2024**

Winds generally coming in off the Atlantic will bring rain from time to time, and fairly extensive low cloud, at least to western mountains. A trend will be toward the wettest conditions being toward the north, as pressure rises across southern Britain. After warm air until Friday focussed on the Pennines and east Wales, lower mountain temperatures will return to the whole of the UK.

**Forecast issued at 15:29 on Monday, 15 July, 2024**
