General Summary for Sunday, 28 July, 2024

British Mountain Summary:

Based on forecast chart for noon 28 July, 2024

Fine almost everywhere, although low cloud will take most the morning to clear summits in some areas. Periods of sun, although cloud will bubble up at times. Blustery coastal hills NW Highlands; otherwise fairly light wind, especially Pennines and east Wales.

Headline for Southeastern Highlands

Dry; periods of sun. Warm. Fairly light wind.

Detailed Forecast for Sunday, 28 July, 2024

How windy? (On the Munros)	South to southwesterly, 15mph, but 20, perhaps 25mph, Angus later in day.
Effect of wind on you?	Mostly small.
How wet? (Precipitation and its impact)	Rain very unlikely
Cloud on the hills?	Very little indeed Cloud will shroud some slopes, mainly west of A9y morning, but the base will progressively rise to clear the summits through the morning.
Chance of cloud free Munros?	Greater than 90% by midday
Sunshine? Air clarity (below cloud)	Extensive sunshine, just patchy cloud. Superb visibility.
How Cold? (at 900m)	6 to rising to a warm 14C mid afternoon.
Freezing Level	Above the summits

Southeastern Highlands - Looking Ahead

	Monday 29 July	Tuesday 30 July
How windy? (On the Munros)	South to southwesterly 15 to 20mph.	Southwesterly 15mph, probably dropping slowly through the day.
Effect of wind on you?	Fairly small.	Mostly negligible
How wet? (Precipitation and its impact)	Rain very unlikely Small risk isolated light showers.	Rain not expected
Cloud on the hills?	Confined to higher tops There may well be little or no cloud all day on the summits. However, threat that the cloud base may be around 1050m most or all morning, but probably then above 1200m.	All clearing Some uncertainty west of A9 in extent of lingering low cloud following arrival of a weakening front overnight. It may be extensive for a few hours, but will gradually break up with summits clearing.
Chance of cloud free Munros?	60%	40% rising to 90%
Sunshine? Air clarity (below cloud)	Patches of weak sunshine (often through high level cloud). Excellent visibility.	Periods of sunshine though some areas (mainly west of A9) may be cloudy, in morning. Patches mist or haze clearing to give excellent or superb visibility.
How Cold? (at 900m)	8C rising to a warm 13C.	8C, rising toward a warm 14C.
Freezing Level	Above the summits.	Above the summits.

Planning Outlook

All mountain areas of Britain from Monday, 29 July, 2024

Extensively fine, very warm and light wind until mid week, although cloudy with a little rain NW Scotland on Monday. Remaining warm with mostly light wind later in the week, but bursts of sometimes thundery rain increasingly likely - at this stage uncertain as to the areas most affected.

Forecast issued at 12:08 on Saturday, 27 July, 2024
