General Summary for Friday, 20 September, 2024

British Mountain Summary:

Based on forecast chart for noon 20 September, 2024

Sunny, warm and calm with only morning valley fog in the Highlands. Low cloud southern Scotland and northeastern England, inversion, tops above the cloud. Sunny Lake District. East Wales under low cloud, west including Snowdon sunny & dry. Showers in Brecon Beacons. Locally gusty Welsh and English hills.

Headline for Southeastern Highlands

Sunny, dry, warm, clouds in some valleys

Detailed Forecast for Friday, 20 September, 2024

How windy? (On the Munros)	Easterly or variable 10mph or less; perhaps 15mph summits south of Perth.
Effect of wind on you?	Negligible.
How wet? (Precipitation and its impact)	Rain not expected
Cloud on the hills?	Very little, but lower hills toward Central Belt covered Fog valleys, extending onto slopes below about 400m. Lifting and dissipating during the day, except for Ochil & Angus Hills which likely to be in cloud all day.
Chance of cloud free Munros?	90%
Sunshine? Air clarity (below cloud)	Bright sunshine and superb visibility on the higher hills; fog and risk very low cloud in and above some valleys - most extensive near eastern coast.
How Cold? (at 900m)	13C (Note much colder lower slopes and valleys morning and where in cloud).
Freezing Level	Above the summits.

Southeastern Highlands - Looking Ahead

	Saturday 21 September	Sunday 22 September
How windy? (On the Munros)	Easterly, mostly 10 to 20mph, toward Loch Lomond and Arran reaching 25mph.	Easterly less than 15mph, at times lull.
Effect of wind on you?	Small in the north, toward Central Belt blustery, walking impeded.	Negligible.
How wet? (Precipitation and its impact)	No rain expected	No rain expected
Cloud on the hills?	Low cloud east & toward Central Belt Morning fog in glens, extending onto slopes below about 400m. Largely dispersing during the morning toward central highlands, but staying near Central Belt and on easternmost Highlands where may lift a little but still cover low/mid slopes below 800m.	High tops and western hills clear Highest tops above the cloud. Roughly west of A9 also lower slopes free of clouds, toward the east and near Central Belt low cloud covering some hills between 100 and 800m.
Chance of cloud free Munros?	80%, east & Central Belt 30%	70%
Sunshine? Air clarity (below cloud)	Sunny, excellent visibility toward Ben Alder or Schiehallion. Low clouds below the tops east of A9 and covering Ochil and Angus Hills.	Very sunny around and west of Pitlochry, clouds toward the central Belt and perhaps east of Glenshee.
How Cold? (at 900m)	10 to 13C	9 to 12C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook

All mountain areas of Britain from Saturday, 21 September, 2024

High pressure conditions with a lot of sunshine, warm temperatures and calm winds continue until early next week in Scotland and northern England. In Wales and Peak District during the weekend heavy showery bursts of rain, possibly thunderstorms. On Monday clouds and brief rain in Scotland. Northern England mostly dry, Peaks and Wales still wet. On Tuesday most likely dry day, before a deep low pressure system arrives on Wednesday/Thursday, bringing strong cooling and a lot of rain to most British mountains. Toward next weekend probably cold and wet, with again some snow on high tops.

Forecast issued at 13:09 on Thursday, 19 September, 2024

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary.
