## General Summary for Monday, 14 October, 2024

### British Mountain Summary:

**Based on forecast chart for noon 14 October, 2024**

Sunshine and light wind on most mountain areas. However, in Wales, low cloud after overnight rain (mainly S Wales), and mist will lift only slowly from the north and west. A weakening front off the coast of NW Scotland will bring a little rain at first, and on Skye, extensive very low cloud.

### Headline for Southeastern Highlands

Extensively dry; cloud above most summits. Light wind.

## Detailed Forecast for Monday, 14 October, 2024

<b>How windy? (On the Munros)</b>	Southerly, 15mph.
<b>Effect of wind on you?</b>	Small.
<b>How wet? (Precipitation and its impact)</b>	<b>Precipitation very unlikely</b>
<b>Cloud on the hills?</b>	<b>Summits extensively cloud free</b> Summits largely cloud free (apart from the odd patch persisting in some corries) and perhaps more widely in morning above 750m, particularly west of A9.
<b>Chance of cloud free Munros?</b>	<b>80% by late morning</b>
<b>Sunshine? Air clarity (below cloud)</b>	Extensive sunshine and superb visibility (some haze lower slopes near central belt). Cloudy at first see areas, especially central highlands where will gradually break to give periods of sun.
<b>How Cold? (at 900m)</b>	1C; tending to rise toward 4C.
<b>Freezing Level</b>	1050-1200m. Widely frosty lowland and upland valleys after dawn.

**Southeastern Highlands - Looking Ahead**

	<b>Tuesday 15 October</b>	<b>Wednesday 16 October</b>
<b>How windy? (On the Munros)</b>  <b>Effect of wind on you?</b>	Southerly, varied speeds; typically 25 to 35mph, but 40mph in some areas (mainly north of major summits).  <b>Fairly small some areas, but widely considerable wind chill and walking arduous; sudden gusts (including on lower slopes) may knock you over.</b>	Southerly; tending to ease through day from 35 to 50mph after dawn toward 25 to 35mph by dusk. Very gusty.  <b>Considerable buffeting and wind chill where exposed. Sudden powerful gusts, sometimes on lower slopes may blow you over.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Drizzly here and there</b> A few pockets of drizzly rain.	<b>Rain on and off</b> Frequently raining, Least wet near and east of Glenshee: the rain sometimes little more than 'spots in the wind', and total rainfall fairly small.
<b>Cloud on the hills?</b>	<b>Persistent fog</b>  Persistent fog above 400 to 650m, locally forming nearer 300m.	<b>Mountains persistently cloud covered</b>  Cloud base widely between 400m and 600m; perhaps a few breaks to 750m.
<b>Chance of cloud free Munros?</b>	<b>Less than 10%</b>	<b>10%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Widely dull and misty.	Rare sunshine coming through glens. Frequently misty as visibility reduced by rain.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	Between 3 and 6C. Will feel colder than freezing point directly in the wind.  Above the summits	8 to 11C, coldest where in cloud. Will feel below freezing point directly in the wind.  Above the summits.

**Planning Outlook**

**All mountain areas of Britain from Tuesday, 15 October, 2024**

Deteriorating over the next few days as wetter conditions, concentrated in most western mountains extends off the Atlantic. There will be bouts of upland gale, but only rarely on highest summits will temperatures drop below freezing point. Least rainfall is likely in the northern NW Highlands (north of Torridon).

**Forecast issued at 7:29 on Monday, 14 October, 2024**
