### Headline for Southeastern Highlands

Murky with drizzle, in places gusty. Mild

## Detailed Forecast for Wednesday, 6 November, 2024

<b>How windy? (On the Munros)</b>	South to southwesterly, 15-20mph, locally less on some slopes, but up to 35mph for periods highest tops central highlands.
<b>Effect of wind on you?</b>	<b>Mostly small, locally blustery over exposed higher terrain, affecting comfortable walking at times.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain unlikely</b> Occasional patchy drizzly rain possible, most frequent west of the A9, further east dry.
<b>Cloud on the hills?</b>	<b>Extensive, lifting to clear lower slopes</b> Shrouding the hills widely from mid-slopes upward. During the day cloud lifting, may thin a little, some breaks possible into afternoon.
<b>Chance of cloud free Munros?</b>	<b>30%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Generally overcast and dull; a little brighter toward Angus. Poor visibility, hazy at best.
<b>How Cold? (at 900m)</b>	7 to 9C. Feeling close to freezing directly in the wind.
<b>Freezing Level</b>	Above the summits

## Southeastern Highlands - Looking Ahead

	Thursday 7 November	Friday 8 November
<b>How windy? (On the Munros)</b>	Southerly, 30 to 40, perhaps very locally 45mph on highest exposed tops.	Southerly, mostly 30 to 40mph, later becoming 20-25mph.
<b>Effect of wind on you?</b>	<b>Strong buffeting, walking heavily impeded, may throw you off balance. Significant wind chill.</b>	<b>Considerable buffeting, walking arduous, wind affecting stability. Significant wind chill effect.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Drizzle possible locally</b> Pockets of fine drizzle alongside dry spots.	<b>Dry at first, later risk rain west</b> High forecast uncertainty: Dry morning, increasing risk of rain in the afternoon, highest areas west of A9.
<b>Cloud on the hills?</b>	<b>Covered extensively</b>  Hills widely covered, cloud on various levels, perhaps down to lowest slopes.	<b>Hills covered extensively</b>  Hills generally in cloud from the low slopes upward, cloud base below 500m.
<b>Chance of cloud free Munros?</b>	<b>20%</b>	<b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Mostly overcast, little to no sun.  Visibility mostly poor.	Very little to no sun.  Poor visibility.
<b>How Cold? (at 900m)</b>	7 to 10C	7 to 9C.
<b>Freezing Level</b>	Above the summits.	Above the summits.

**Planning Outlook****All mountain areas of Britain from Thursday, 7 November, 2024**

Southerly flow until end of the week, damp with clouds, but possibly more often breaks in cloud on Thursday and on Friday for eastern hills, while western coastal mountains will get some rain. Often cloudy but mostly dry on Saturday, before another weak front strikes on Sunday, bringing rain again to westernmost hills. Next week high pressure centres over the UK, sunnier conditions with hardly any rain are expected until next weekend, when weather may switch to more wet pattern. Until then, fairly mild.

**Forecast issued at 18:14 on Tuesday, 5 November, 2024**
