General Summary for Thursday, 13 March, 2025

British Mountain Summary:

Based on forecast chart for noon 13 March, 2025

Chilly northerly winds, strongest over the Pennines, here bringing a scattering of mostly brief showers with hail and hill snow. Local areas of snow showers in northern Scotland too. Otherwise, largely dry, only isolated flurries and some sun, typically best in the morning. Evening into night, some snow develops from north for Highlands.

Headline for Southeastern Highlands

Chilly, but wind fairly light. Largely dry, sunniest in morning.

Detailed Forecast for Thursday, 13 March, 2025

How windy? (On the Munros)	Northerly 15mph or less.
Effect of wind on you?	Mostly small
How wet? (Precipitation and its impact)	Largely dry day, rare brief flurries Mostly dry, but chance of isolated soft hail flurries mainly afternoon, spots of rain lowest slopes. Later evening into night, spells of snow passing southwards.
Cloud on the hills?	Confined to or often above higher summits. Cloud patches briefly around 900m and intermittently clearing to higher tops.
Chance of cloud free Munros?	70%
Sunshine? Air clarity (below cloud)	Sunshine most widely in the morning, then cloudier with patchy bright sun. Excellent visibility.
How Cold? (at 900m)	-3C rising to -1C.
Freezing Level	500m, tending to rise to 700m. Frost glens post dawn.

Southeastern Highlands - Looking Ahead

	Friday 14 March	Saturday 15 March
How windy? (On the Munros)	Northeasterly 10-20mph.	West to northwesterly 15 to 20mph.
Effect of wind on you?	Mostly small.	Fairly small, but feeling chilly in exposure on higher terrain.
How wet? (Precipitation and its impact)	Brief snow showers Local brief snow showers come and go over higher terrain. West of A9 may stay mostly dry. Mostly rain below 500m.	Precipitation unlikely
Cloud on the hills?	Often clear, passing cloud banks Some fog in glens and corries in the morning. Many areas often clear, occasional cloud banks come and go, bases reaching down to 1000m.	Occasional patches forming Most or all mountains starting clear, staying clear much of the day particularly toward east. Some patchy cloud forming occasionally above 1000-1200m.
Chance of cloud free Munros?	80%	80%
Sunshine? Air clarity (below cloud)	Frequent sunshine, extensive west of A9. Excellent visibility.	Sunshine best in the morning, then cloudier skies develop with patchy sun. Visibility excellent.
How Cold? (at 900m)	-2C, warming a degree or two, best warming west of A9.	-2C rising to 0C or slightly higher afternoon. Feeling near -10C if in stronger breeze.
Freezing Level	All terrain frozen at dawn, frost into the glens. A gradual rise towards 800m.	Much terrain frozen with frost into glens from dawn. Rising to 900m or slightly higher during afternoon.

Planning Outlook**All mountain areas of Britain from Friday, 14 March, 2025**

Staying cold through the weekend into the start of next week, with frost overnight to lower slopes and valleys, then during the daytimes the freezing level lifting onto higher slopes. Higher pressure expands across all areas from the north, bringing largely dry conditions and rare brief light showers. A largely fine weekend ahead with light winds, sunny spells, variable cloud, and very clear crisp air. Some showers may run into northern Scotland on stronger winds here. Next week, a gradual shift back to less cold southeasterlies, with some showery rain developing from midweek, possibly more widespread spells of rain and some hill snow later in the week.

Forecast issued at 16:00 on Wednesday, 12 March, 2025
