	Sunday 30 March	Monday 31 March
How windy? (On the Munros) Effect of wind on you?	Northwesterly slowly easing from 60mph post dawn to around 40mph by evening, when will back westerly. Very difficult conditions, particularly morning when wind chill severe and general mobility challenging on higher	Ranging from 40mph highest summits west of A9 to 30 or 35mph elsewhere. Least windy near central belt. Marked increase of speed with height: considerable wind chill and buffeting on higher areas.
How wet?	Rain very unlikely	Little or no rain
(Precipitation and its impact)		Risk of a little drizzle rain now and again mainly west of A9.
Cloud on the hills?	Confined to highest summits by late morning; may nearly all clear.	Very extensive; lowest cloud base near coast, especially near Skye
	By late morning cloud base typically 1000 to 1200m. May well lift off highest summits for periods.	Cloud base will tend to rise through day, by afternoon typically 500 to 700m, but may lift above 900m (perhaps clearing altogether) Ochils and near and east of Glenshee,
Chance of cloud free Munros?	70%	20%
Sunshine? Air clarity (below cloud)	Glimpses of sun; most sun lower slopes easternmost areas. Slight haze, particularly west of A9.	Sunshine beginning to come through particularly toward and east of Glenshee where perhaps extensive sun afternoon. Vey good visibility.
How Cold? (at 900m)	5C Rising slowly through the day. Will feel as cold as minus 8C directly in the wind.	5C. Will feel as cold as minus 6 Celsius directly in the wind.
Freezing Level	Above the summits	Above the summits.

Planning Outlook

All mountain areas of Britain from Sunday, 30 March, 2025

Pressure will rise across the UK early next week, bringing extensively dry and for a few days very warm weather - albeit on Monday the remnants of fronts will bring a little rain but extensive low cloud to some western mountains. Later next week, some forecasts suggest a marked drop in temperature levels as the high pressure shifts position to the north of Scotland.

Forecast issued at 16:04 on Friday, 28 March, 2025

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
