Southeastern Highlands - Looking Ahead

	Wednesday 7 May	Thursday 8 May
How windy? (On the Munros) Effect of wind on you?	Variable or mostly northeasterly, 10mph or less. Negligible	Easterly 10-15mph, typically strongest on southernmost hills. Small
How wet? (Precipitation and its impact)	Rain not expected	Rain not expected
Cloud on the hills? Chance of cloud free Munros?	Little or none Brief patches may cap some higher tops in the morning, mainly near or east of the A9, lifting above the summits. 90%	Little if any Patches or fragments around some upper slopes in the morning, lifting above the summits by middle of the day. 90%
Sunshine? Air clarity (below cloud)	Sun and high cloud, patchy fair-weather cloud filling in for a time afternoon. Visibility excellent.	Sunshine and fair-weather cloud, which may fill in a little by afternoon. Visibility excellent.
How Cold? (at 900m) Freezing Level	2C at dawn, rising as high as 11C by afternoon, though eastern areas may only reach 7C. Generally above the summits, but at dawn near freezing with slight frost both in the glens and on sheltered higher terrain.	5C but some spots colder at first, rising up to 11C by afternoon; easternmost hills may be slightly cooler. Generally above the summits, but just at dawn slight frost possible some glens and sheltered higher terrain.

Planning Outlook

All mountain areas of Britain from Wednesday, 7 May, 2025

A quiet spell of weather as high pressure continues to dominate over the British Isles this week and very possibly well into next week too. Generally dry conditions, low risk of an isolated afternoon shower. Winds mostly light, direction variable. Chilly nights with frost in valleys and sheltered higher terrain. Becoming pleasantly warm into the afternoons. Sunshine and variable cloud, at times covering the sky, but generally above the mountain tops with excellent visibility. Very dry ground conditions, beware high risk of fire.

Forecast issued at 16:00 on Monday, 5 May, 2025
