General Summary for Saturday, 17 May, 2025

British Mountain Summary:

Based on forecast chart for noon 17 May, 2025

Strong sunshine for the Highlands, Lakes and much of Wales all day; beware sunburn. Cloudy for the Pennines to the Borders in the morning, gradually dispersing to give sunshine into afternoon; feeling cool here with a fresh NE'ly breeze, strong and gusty in the morning. Warmest in western Scotland.

Headline for Southeastern Highlands

Sunshine, cooler toward east. Gusty breeze, stronger later.

Detailed Forecast for Saturday, 17 May, 2025

How windy? (On the Munros) Effect of wind on you?	North/northeasterly 10-20mph, lower around Loch Tay. Highest winds around easternmost mountains. Notable gusts. Strengthening further late afternoon through dusk to 25-35mph, strongest in east, gusts 40mph. Mostly small, though feeling gusty around Glenshee. Deteriorating late in day to become more challenging walking.
How wet? (Precipitation and its impact)	No rain
Cloud on the hills?	None expected
Chance of cloud free Munros?	Practically certain
Sunshine? Air clarity (below cloud)	Extensive strong sunshine. Visibility excellent or superb.
How Cold? (at 900m) Freezing Level	10 or 11C, rising slightly during the day. Areas west of A9 rising towards 13C, locally 15C near Ben Lawers. Above the summits

All mountain areas of Britain from Sunday, 18 May, 2025

High pressure remains to the north into early next week, easterly breezes prevailing. A few showers are possible mainly England and Wales. Warm sunshine most abundant in western Scotland. A change in the weather pattern is expected from midweek as pressure generally falls, bringing a greater risk of showers or areas of rain - a more unsettled outlook onward into next weekend with cooler temperatures, often stronger winds and cloud shrouding the hills for periods. In the short-term, ground conditions remain extensively dry, water courses are very low and the fire risk is very high.
