MOUNTAIN WEATHER INFORMATION SERVICE

Southeastern Highlands

The southern Highlands as far west as the Callander area and north to Loch Ericht, Drumochter and summits near Glenshee ski-centre (summits within the historic county of Perthshire). Also Ochils and Angus hills.

General Summary for Sunday, 13 July, 2025

British Mountain Summary: Based on forecast chart for noon 13 July, 2025

Very warm across the mountains from overnight, soon feeling hot in morning sun. Some valleys again approaching 30C by early afternoon, though mostly slightly less hot than Saturday. A veil of high cloud tending to weaken the sun. Local gusty E-SE'ly winds. Generally dry, later a chance of very isolated showers.

Headline for Southeastern Highlands

Very warm, sun and increasing high cloud.

Detailed Forecast for Sunday, 13 July, 2025

How windy? (On the Munros)	South to southeasterly 10-15mph, strengthening a little during day, to 20mph at times particularly eastern areas.	
Effect of wind on you?	Mostly small, but feeling breezier with time on higher areas.	
How wet? (Precipitation and its	Rain very unlikely Chance of localised spots of rain from high cloud later in day remote risk of an isolated	
impact)	thundery shower central areas.	
Cloud on the hills?	Hills clear	
	Local patches of haar from North Sea on lowest eastern slopes around dawn will soon clear.	
	Fog/low cloud may return to southeasternmost hills as night falls.	
Chance of cloud free Munros?	100%	
Sunshine? Air clarity (below cloud)	Sunny most of the day, some high cloud increasingly weakening the sun. Excellent visibility.	
How Cold? (at 900m)	15 to 16C, already very warm from overnight, rising towards 18C central highlands; dropping slightly into evening. Central valleys reaching 27C by early afternoon, locally approaching 30C.	
Freezing Level	Above the summits

MOUNTAINEERING SCOTLAND

Southeastern Highlands - Looking Ahead

	Monday 14 July	Tuesday 15 July
How windy? (On the Munros)	Southeast later southerly 25 to 35mph, very gusty for a period, around some tops near 40mph.	Variable direction, mostly less than 10mph.
Effect of wind on you?	Affecting comfortable walking and balance on exposed terrain; risk of buffeting gusts, more challenging conditions for a time.	Small
How wet?	Threat of thunderstorms developing	Early patchy rain, risk showers
(Precipitation and its impact)	Misty drizzle on some eastern hills in morning, largely dry start toward west. Increasing risk with time of thundery rain developing and moving up from south, heavy rain may set in later.	Remnants of previous thundery rain may leave patchy light rain into morning. By afternoon, risk of localised slow-moving heavy showers.
Cloud on the hills?	Low cloud fairly extensive	Cloud at different heights, breaks likely
	Covering hills to mid or lower elevations, particularly eastern areas, but may be widespread. Some highest slopes may be near top of cloud layer for a time. In rain, cloud filling in widely.	Fairly extensive, banks of cloud to lower slopes in morning, some slopes may emerge between or above cloud layers early in day before cloud lifts upslope. Hills may fully clear for a time, but cloud returning and lowering in showers.
Chance of cloud free Munros?	20%	50%
Sunshine? Air clarity (below cloud)	Rare weak sun. Hazy or misty.	Some sun through cloud layers, may brighten up, but expect high cloud. Misty morning, visibility improving.
How Cold? (at 900m)	10C where in cloud, may reach 13C north of Loch Tay. Tending to drop widely during day.	9 or 10C, small variation all day.
Freezing Level	Above the summits	Above the summits

Planning Outlook

All mountain areas of Britain from Monday, 14 July, 2025

Lowering pressure from southwest late Sunday into Monday bringing increasing risk bursts of rain and thunderstorms to start the new week, strong and gusty southerly winds. Temperatures will cool towards average. Heavy rain likely moving across England and Wales on Tuesday accompanied by near-gale southwesterlies, lighter winds Scotland. Low pressure is likely to be common in the extended outlook with slow-moving areas of showery rain, some thundery bursts locally, interspersed with drier days. Temperatures often on the warm side, some humid days.

Forecast issued at 16:00 on Saturday, 12 July, 2025
