### General Summary for Monday, 29 September, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 29 September, 2025

Scotland: Southwesterly winds with a warm front bringing cloud and patchy rain into afternoon for western hills. Eastern hills substantially clear with morning sunshine.

England/Wales: Sunshine giving way to veil of cloud, with will lower onto higher western tops with local drizzle. Dry elsewhere.

#### Headline for Southeastern Highlands

Sunny morning. Clouding over in afternoon. Hills still clear. Wind picking up.

### Detailed Forecast for Monday, 29 September, 2025

<b>How windy? (On the Munros)</b>	Southwesterly 15mph or less. A gradual rise brings gusts up to 30mph+ over tops and downslope late in the day.
<b>Effect of wind on you?</b>	<b>Ease of walking gradually becoming affected, particularly in gusts over tops and elevated passes.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Likely dry most of the day</b> Likely dry well into the day. Spotty drizzly rain forming later afternoon from the west with fine drizzle drifting around tops in cloud.
<b>Cloud on the hills?</b>	<b>Substantially clear</b> Likely only ragged patches on high summits well into the day. May begin to fill in above 900m towards central highlands late in the day.
<b>Chance of cloud free Munros?</b>	<b>80%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Mostly sunny through morning, before a veil of high cloud then thickens from the west. Excellent visibility.
<b>How Cold? (at 900m)</b>	6C, nearer 5C Loch Tay to Loch Rannoch early. Rising to 7C east of Glenshee.
<b>Freezing Level</b>	Above the summits

## Southeastern Highlands - Looking Ahead

	<b>Tuesday 30 September</b>	<b>Wednesday 1 October</b>
<b>How windy? (On the Munros)</b>	South to southwesterly, 20mph to gusty 25mph around some exposed high tops.	South-westerly 25 to 35mph, strongest over the tops and through some passes.
<b>Effect of wind on you?</b>	<b>Fairly small, but blustery in places, may start to affect balance on exposed ridges.</b>	<b>Very blustery and gusty with a pronounced lift in wind speed with height. Marked wind chill and buffeting.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Occasional drizzly rain</b> A little rain or drizzle, most common central highlands, amounts generally small. Further east from Glenshee more often dry or just patchy drizzle.	<b>Occasional rain</b> Periods of rainfall through the day, perhaps focused in the morning as a front passed through. Following this, occasional rain and drizzle.
<b>Cloud on the hills?</b>	<b>Extensive, lowest west</b>  Shrouding the mountains across the central highlands above 700-800m much of the day, possibly lower in the morning. Further east, bases higher, but still fairly extensive on the Munros.	<b>Extensive</b>  Cloud will cover the hills in fog extensively through the day. Whilst bases will vary, bases will often be around 600-800m, perhaps a little higher in the east.
<b>Chance of cloud free Munros?</b>	<b>20%</b>	<b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Overcast, rare glimpses of sun mainly eastern areas. Visibility poor when damp, better below cloud further east.	A little weak sun may come through a veil of cloud at times, mainly in the east. Visibility sometimes poor due to rain.
<b>How Cold? (at 900m)</b>	7C, little change all day where in cloud, clearer spots rising to 9C.	9C. Feeling closer to zero in the strongest winds.
<b>Freezing Level</b>	Above the summits	Above the summits

## Planning Outlook

### All mountain areas of Britain from Tuesday, 30 September, 2025

Next week the UK is situated under a boundary between high and low pressure with a trend towards more settled conditions in the south, unsettled in the north. Northwest England and west Scotland could be rather wet with a southwesterly wind pushing cloud and spells of rain onto western hills. Several more organized frontal systems are likely to pass into eastern Scotland as well. Generally dry for the Pennines and Wales, though cloud and occasionally drizzly rain will impact western areas, notably Lakeland and Snowdonia. Sun breaks likely in England but short-lived. First indications of more widely unsettled weather into next weekend as a deeper area of low pressure passes north, though confidence remains low regarding timing and strength.

### Forecast issued at 16:30 on Sunday, 28 September, 2025

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
