General Summary for Sunday, 21 June, 2026

British Mountain Summary:
Based on forecast chart for noon 21 June, 2026

Extensive bright sunshine - beware of sunburn and dehydration - and light wind. Cloud and a few brief showers NW Highlands will move away north, whilst along the Pennines and later Cumbria and S Scotland, patchy cloud and an isolated shower will form.

Headline for Southeastern Highlands
 Light wind; bright sunshine and very clear air.

Detailed Forecast for Sunday, 21 June, 2026

How windy? (On the Munros)	Southwesterly 10 to 15mph morning, dropping middle of day below 10mph and becoming southerly.
Effect of wind on you?	Becoming negligible.
How wet? (Precipitation and its impact)	Rain not expected
Cloud on the hills?	Little if any Patches of cloud some higher slopes until mid or late morning, then dispersing.
Chance of cloud free Munros?	Above 90%
Sunshine? Air clarity (below cloud)	Extensive, in some areas unbroken bright sunshine. Visibility excellent or superb.
How Cold? (at 900m)	7C at dawn, rising to 14C afternoon.
Freezing Level	Above the summits.

Southeastern Highlands - Looking Ahead

	Monday 22 June	Tuesday 23 June
How windy? (On the Munros)	Southerly between 15 and possibly 25mph.	Southwesterly, in the range 20 to 30mph: probably strengthening through day; least wind toward central belt.
Effect of wind on you?	Fairly small	Mostly fairly small, although some buffeting on higher areas later in day.
How wet? (Precipitation and its impact)	Risk a few hours of rain (Low confidence) Moderate risk of 2 to 4 hours of mostly light rain - just the odd heavier burst.	Rain unlikely
Cloud on the hills?	Low confidence: Extensive, particularly morning. Extensive fog from dawn, in many areas forming from lower slopes up. Will improve, perhaps markedly as many, perhaps nearly all summits hills clear through the morning. But significant risk of low cloud returning in rain.	Cloud may shroud higher summits late in day Most, probably all summits cloud free all day. But small risk toward evening west of A9 of cloud shrouding areas above 750 to 1000m.
Chance of cloud free Munros?	60%	Greater than 90%
Sunshine? Air clarity (below cloud)	Only glimpses of sun - through layers of high cloud.. Excellent visibility.	Extensive sunshine - may give way from west later in day. Excellent visibility although hazy toward central belt.
How Cold? (at 900m)	10C rising to 13 to 15C.	14 to 17C
Freezing Level	Above the summits	Above the summits.

Planning Outlook**All mountain areas of Britain from Monday, 22 June, 2026**

Extensively dry, very warm but very humid indeed England and Wales, although around Monday chance of a thunderstorm. Rain and low cloud at times Scotland, mainly affecting western mountains - although later next week the warmth encroaching into Scotland. There may well be widespread thunderstorms later in the week, before less hot weather extends from the Atlantic around next weekend.
