General Summary for Monday, 2 November, 2026

British Mountain Summary:
Based on forecast chart for noon 2 November, 2026

Light winds for much of the Highlands; a stronger northeasterly breeze for England & Wales, particularly toward the south, feeling chilly. Generally dry, sunshine best in southern Scotland and toward the Irish Sea coast. Some cloud banks in northern Scotland, but high mountains may poke out above this.

Headline for Southeastern Highlands

Fairly light wind and mostly sunny.

Detailed Forecast for Monday, 2 November, 2026

How windy? (On the Munros)	Northerly 10 to 20mph, strongest higher tops near and east of Glenshee, dropping less in afternoon central highlands.
Effect of wind on you?	**Mostly small, but more noticeable and feeling chilly on higher slopes in east.**
How wet? (Precipitation and its impact)	**Rain not expected**
Cloud on the hills?	**Little if any** Patchy cloud banks around some hill slopes, mostly areas toward Glenshee and Lochnagar, but many mountains largely clear. Local early mist in glens.
Chance of cloud free Munros?	**80%, to above 90% south-central tops.**
Sunshine? Air clarity (below cloud)	Sunshine much of the day toward central belt, patchy cloud north/east of Pitlochry. Visibility excellent; slight haze some lower slopes.
How Cold? (at 900m)	2 to 4C, little change higher up on Munros. Feeling like -3C in stronger wind in east.
Freezing Level	Above the summits, but patchy frost in glens at first, also some sheltered higher slopes and corries.

Southeastern Highlands - Looking Ahead

	Tuesday 3 November	Wednesday 4 November
How windy? (On the Munros)	Easterly 15mph, some gustier spots 20mph, mainly near the central belt.	Southeasterly 10 to 15mph, local gusts 20mph toward Callander area.
Effect of wind on you?	**Mostly small, more noticeable on some slopes toward the south of the region.**	**Mostly small.**
How wet? (Precipitation and its impact)	**Little or no rain** Some patchy drizzle possible on some east-facing hills toward the lowlands.	**Largely dry** Odd spots of drizzle around cloud in east.
Cloud on the hills?	**Fairly extensive, high tops may be clear** Cloud banks rolling across high terrain, the base mostly above 700-800m, whilst the top of the cloud close to higher summits which may emerge above at times. Breaks more often toward and west of Loch Tay.	**Varying over hills** Banks of cloud drifting across mid and upper slopes, most persistent in more eastern areas, more broken west; some highest summits may be just above cloud.
Chance of cloud free Munros?	**30% (some tops above cloud)**	**50%**
Sunshine? Air clarity (below cloud)	Occasional sun mostly central highlands. Visibility very good out of cloud.	Patchy cloud and sun, best toward west. Visibility very good.
How Cold? (at 900m)	3 to 5C, coolest if in cloud; little change with added height.	2 or 3C.
Freezing Level	Above the summits, but pockets of frost both higher and lower slopes at dawn.	Above the summits, but frost in morning in some glens and upland hollows.

Planning Outlook

All mountain areas of Britain from Tuesday, 3 November, 2026

A settled week ahead as high pressure resides toward the north. Easterly winds will prevail, strongest for Wales and the southern Pennines. Largely dry weather, whilst variable cloud will be drawn in from the North Sea, at times some light showers in eastern areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows; then cooler toward the weekend on tops. Quiet weather also likely as next weekend begins, perhaps further ahead, though a mixed Atlantic influence may return to Scotland.
