General Summary for Wednesday, 4 June, 2025

British Mountain Summary:

Based on forecast chart for noon 4 June, 2025

Cold: showers (very frequent west) of hail and on higher slopes snow and gale force upland winds. Southward into England and Wales, a little less cold, progressively fewer showers and decreasingly windy.

Headline for Southern Uplands

Blustery. Showers, mainly morning.

Detailed Forecast for Wednesday, 4 June, 2025

How windy? (On the summits)	Southwesterly 25 to 30mph, gustiest in and around showers.
Effect of wind on you?	Mostly fairly small, although noticeably impeding ease of walking on higher tops where wind chill considerable.
How wet? (Precipitation and its impact)	Showers, mainly morning. Scattered showers - in places the rain frequent over an hour or mid to late morning.
Cloud on the hills?	Clearing the summits by or soon after midday Cloud will shroud higher areas frequently morning; the base may drop below 400m for an hour or two Galloway and 500m elsewhere. Will improve middle of day as most or all cloud lifts above the summits.
Chance of cloud free summits?	90% afternoon
Sunshine? Air clarity (below cloud)	Bursts of sunshine; becoming sunnier through afternoon. Visibility very good or excellent.
How Cold? (at 750m)	3C rising to 6C. Feeling as cold as -4C where exposed to the wind.
Freezing Level	Above the summits

Southern Uplands - Looking Ahead

	Thursday 5 June	Friday 6 June
How windy? (On the summits)	Southwesterly 20mph.	West backing southwesterly 15mph
Effect of wind on you?	Small.	Small
How wet? (Precipitation and its impact)	Some uncertainty - probably widely dry Most likely little or no rain, although possibly rain temporarily over an hour or so in the afternoon.	Risk of showers Showers: very few morning, then through afternoon showers more widely, some heavy.
Cloud on the hills?	Mostly confined to higher tops Cloud on higher slopes at times morning will probably lift above the summits. Where rain occurs, cloud base will drop again, perhaps below 500m Galloway.	Clearing most or probably all summits by afternoon Cloud base rising; by late morning most cloud above the summits.
Chance of cloud free summits?	70%	90% by midday
Sunshine? Air clarity (below cloud)	Patches of sun, although there may well be extensive thin high level cloud weakening the sunshine. Excellent visibility.	Patches of sunshine, although particularly morning, mostly cloudy Galloway. Excellent visibility.
How Cold? (at 750m)	6C.	5C near the coast, rising to 7 to 9C, warmest east of M74.
Freezing Level	Above the summits.	Above the summits.

Planning Outlook

All mountain areas of Britain from Thursday, 5 June, 2025

Remaining chilly (intermittently near freezing point highest Scottish summits) for the remainder of the week - and probably most of next week. Rainfall and low cloud will remain frequent across particularly western mountains. Often windy higher summits - although mostly speeds below gale force.

Forecast issued at 15:03 on Tuesday, 3 June, 2025
