General Summary for Wednesday, 22 October, 2025

British Mountain Summary:

Based on forecast chart for noon 22 October, 2025

Chilly west to southwest winds, strong for a time north Highlands, with showers across western hills, but few if any reaching eastern areas. Cloud bases lifting to higher slopes, but persisting across western tops, whilst eastern hills seeing good clearances with the best of the sunshine, albeit weak due to high cloud.

Headline for Southern Uplands

Breezy and chilly with a few, mostly light, showers. Occasional cloud on tops.

Detailed Forecast for Wednesday, 22 October, 2025

How windy? (On the summits)	West or southwesterly 15 to 25mph, possible 30mph around dawn; tending to lessen during day.
Effect of wind on you?	Fairly small, but more blustery and feeling noticeably chilly on exposed higher terrain, particularly morning.
How wet? (Precipitation and its impact)	Rare if any precipitation One or two light showers mostly Galloway hills, possibly more frequent later.
Cloud on the hills?	Occasionally on high tops Some patchy cloud on higher slopes in Galloway, mostly above 700m. Patches may graze higher slopes further east, but many hill tops often clear.
Chance of cloud free summits?	70%
Sunshine? Air clarity (below cloud)	Fairly cloudy, some sun, best in east. Visibility excellent.
How Cold? (at 750m)	5C. Feeling below freezing in the wind.
Freezing Level	Above the summits

All mountain areas of Britain from Thursday, 23 October, 2025

A complex weather situation around midweek with various centres of low pressure drifting around slowly . Areas of rain and showers, but also drier moments - possibly Thursday often dry in eastern Scotland and northern England - beware of a deterioration from the northwest during Thursday with gales and rain setting in . Significantly colder later in the week as winds turn northerly. Freezing level dropping to 800-1000m into the weekend, lowest in northern Scotland. A mix of sunshine and showers falling as snow on high terrain, most frequent in north-facing areas. Falling week, less cold, but frequent rain in the west.
