General Summary for Friday, 11 September, 2026

British Mountain Summary:

Based on forecast chart for noon 11 September, 2026

Fresh westerly winds will be strongest in northern Scotland, speeds lessening a little during the day, but feeling cool in exposure on tops. Light showers mainly in western Scotland tends to fade. Cloud often capping western tops, breaks forming higher with time; clearer hills toward east.

Headline for Southern Uplands

Moderate breeze. Local light showers and cloud mostly west.

Detailed Forecast for Friday, 11 September, 2026

How windy? (On the summits)	Westerly 20-25mph, slightly easing during day, but some notable gusts toward east. Rising onward into night to 50-60mph from west.
Effect of wind on you?	Blustery and cool in exposure particularly early in day. Deteriorating into night to gales on high terrain.
How wet? (Precipitation and its impact)	Most hills dry, light showers west A little spotty rain drifts onto hills around Merrick and Ayrshire hills early in day, soon fading for widely dry hills. Rare light showers westernmost hills afternoon. Rain develops into night, heavy in west.
Cloud on the hills?	Breaking soonest east, more widely with time Cloud rolls over high terrain from the M74 west in the morning, ragged low patches in sheltered areas. Cloud tends to lift and break, soon little if any east Borders to Cheviots, and increasingly breaking above western tops too.
Chance of cloud free summits?	Rising to 70%, or 90% east
Sunshine? Air clarity (below cloud)	Often sunny east, variable high cloud west of M74. Good visibility, though a building haze west.
How Cold? (at 750m)	8 to 10C, mildest east where rising a degree afternoon. Feeling near freezing on tops in early wind.
Freezing Level	Above the summits.

All mountain areas of Britain from Saturday, 12 September, 2026

Changeable west-southwesterlies prevail through mid September; often windy, gale-force winds for periods over higher terrain. An active frontal system sweeps southeastward on Saturday with a sustained fall of rain, accompanied by upland gales for most places. Improving for better weather on Sunday, then wind and rain returns into Monday, staying showery into Tuesday. A mixed outlook likely continues later next week with rain most frequent in western Scotland. Temperatures varying, some cooler days especially in Scotland, but often fairly mild further south, at times quite warm and humid.
