General Summary for Sunday, 15 June, 2025

British Mountain Summary:

Based on forecast chart for noon 15 June, 2025

Westerly breezes bring extensive cloud to western hills and mountains, with intermittent drizzly rain or light showers, most persistent western Scotland. Further inland and eastwards, the cloud bases higher and more often dry through the day.

Headline for West Highlands

Breezy, rather cool. Low cloud and drizzly rain or showers.

Detailed Forecast for Sunday, 15 June, 2025

How windy? (On the Munros)	West to southwesterly, 20 to 25mph. Strengthening into night to 35mph.
Effect of wind on you?	Fairly small, but feeling blustery where exposed on tops and some ridges.
How wet? (Precipitation and its impact)	Drizzly rain much of day Drizzly rain on and off, though persistently damp most or all day within 10 miles of so of the general lie of the west coast (including near Loch Linnhe) and Loch Etive; fading a little toward evening. Drizzly showers extending increasingly inland.
Cloud on the hills?	Mostly extensive; very low cloud base near the coast Within 10 miles of so of the general lie of the west coast: cloud base sometimes lower than 300m coastal slopes and rarely above 500m at all. Further inland; cloud base may vary, but often extensive above 600-800m, lowest during drizzle.
Chance of cloud free Munros?	10%
Sunshine? Air clarity (below cloud)	Mostly overcast. Often misty near the coast, and where drizzly; good visibility at times well inland below cloud.
How Cold? (at 900m)	6 to 9C - coldest coastal hills. In the breeze, feeling close to freezing.
Freezing Level	Above the summits.

All mountain areas of Britain from Monday, 16 June, 2025

Little rainfall most of the week ahead and increasingly warm, although western Scotland cooler with occasional rain as weakening fronts affect particularly the NW Highlands early week. By midweek, fine for a few days everywhere. Lowering pressure by next weekend brings a risk of showery rain returning with cooler temperatures, although detail very uncertain by this stage.

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service. 2025.
