

West Highlands

Western Highlands accessible from, and south of, Glenfinnan (Road to the Isles) and Glen Spean (includes Creag Meagaidh). This area includes Ben Nevis and the mountains around Glencoe. In the east, from Ben Alder south to Loch Lomond and Trossachs NP. Also Arran and Mull.

New SWIFT LT - Ultra-compact, featherweight lighting - USB-C rechargeable, rain resistant headlamp. 380 Lumens, perfect for lightweight adventures or as a reliable backup. Find out more at [petzl.com](https://www.petzl.com)

General Summary for Thursday, 3 September, 2026

British Mountain Summary:

Based on forecast chart for noon 3 September, 2026

Strong to gale-force winds over high terrain. A lot of cloud, shrouding all western hills, plus patchy rain and drizzle, becoming heavier persistent falls in the west later; a swathe of more intense rain develops for southwest Scotland into northwest England by evening, later into north Wales.

Headline for West Highlands

Gales on tops; damp and cloudy, some heavier rain at times.

Detailed Forecast for Thursday, 3 September, 2026

How windy? (On the Munros)	Southwesterly between 35 to 50mph, will vary somewhat, tops speeds approach 55mph, more sustained later in day.
Effect of wind on you?	Arduous walking in exposure most of the day, some more challenging moments with significant wind chill.
How wet? (Precipitation and its impact)	Patchy rain, showery for a time Patchy rain drifts from the west much of the day, generally light and well-inland hills often dry. Rain will become more frequent with heavy falls for a few hours during afternoon and onward to evening.
Cloud on the hills?	Rising towards higher inland terrain, staying lower coasts Fairly extensive above 600m early, lowest towards the coast; bases rise, breaks approaching high terrain around Rannoch Moor. Elsewhere, breaks above 800-900m rare, and more widely lowering for a few hours.
Chance of cloud free Munros?	20% west, to 40% well inland.
Sunshine? Air clarity (below cloud)	Some patchy sunshine, thin high cloud, and sometimes more overcast south. Good visibility under cloud, but hazy particularly along the coast.
How Cold? (at 900m)	8 or 9C. Feeling below freezing in strongest wind.
Freezing Level	Above the summits.

West Highlands - Looking Ahead

	Friday 4 September	Saturday 5 September
How windy? (On the Munros)	Southwest then westerly, 40 to 55mph, at times 60mph higher summits, stronger gusts on highest tops 70mph.	Westerly 30-40mph at dawn, soon easing to 20-25mph, turning southwest later southerly; rising from dusk to 50-70mph.
Effect of wind on you?	Arduous to difficult walking conditions, frequent buffeting knocking you off balance on exposed terrain. Significant wind chill.	Blustery and chilly start, but lessening to be fairly small until evening. Deteriorating significantly into night.
How wet? (Precipitation and its impact)	Often raining Rain on and off throughout the day, more frequent for periods with some steady rain mixed with heavier showery bursts, may break up a little into afternoon.	A few showers, risk rain later Showers mostly coastal mountains early in the day tending drift inland but becoming well scattered and light, fading with time. From dusk into night, risk of sustained heavy rain developing from south.
Cloud on the hills?	Extensive higher areas, lower coasts Fairly persistent over many western groups above 500-700m, lowest near the coast and during rain. Well inland the cloud base higher, some breaks above 800-900m, tending to rise a little into afternoon.	Lifting, breaks to some tops Cloud banks drift over hills above 800-1000m in the morning, lowest further west. Base rising mostly above 1000m by middle of day, but patches may come and go into afternoon on higher tops and near coast.
Chance of cloud free Munros?	10% coasts, 30% well inland.	60%
Sunshine? Air clarity (below cloud)	Largely cloudy, brief glimpses of sun well inland. Visibility often reduced by rain, locally good below cloud especially east; a general haze near the coast.	Brief glimpses of sun inland, high cloud tending to build from south later. Visibility very good inland, slight coastal haze in west.
How Cold? (at 900m)	7C, little change all day. Directly in the wind, feeling like -5C.	6C rising to 8C afternoon, little change or rising a degree or so higher into night. Feeling like -5C in the wind at first.
Freezing Level	Above the summits.	Above the summits.

Planning Outlook

All mountain areas of Britain from Friday, 4 September, 2026

A series of weather systems moves in from the Atlantic over the next 10 days to bring spells of rain and showers, accompanied by frequently strong to gale force mountain winds. A window of better weather is likely on Saturday for Scotland and northern England, but further rain is expected to move in from the southwest by Saturday night and Sunday, heaviest western Scotland; a risk of more powerful upland gales developing over Scotland into Sunday. Temperatures will vary, mildest toward the south, but some cooler air moves in from the north at times bringing higher Scottish tops close to freezing point.

Forecast issued at 16:31 on Wednesday, 2 September, 2026
