General Summary for Wednesday, 14 April, 2021

British Mountain Summary:

Based on forecast chart for noon 14 April, 2021

High pressure resides across Britain. Little wind overall. Very clear with a good amount of sun, but also some areas of cloud, which will produce one or two localised showers, these mostly just isolated flurries of hail or snow. Temperatures rising just above freezing point on many summits, except the very highest tops in Scotland.

Headline for Yorkshire Dales and North Pennines

Light winds. Typically dry, hills clear.

Detailed Forecast for Wednesday, 14 April, 2021

How windy? (On the summits)	Northeasterly 5mph increasing through day to 15mph late afternoon or evening.
Effect of wind on you?	Small, but feeling chilly on tops later.
How wet? (Precipitation and its impact)	Isolated showers Chance of an isolated shower with hail. Where these do form, they will move around slowly for an hour or so.
Cloud on the hills?	Little if any Fragments of cloud may briefly form on higher slopes in morning, otherwise most cloud which forms will be above the hills. Brief patches below 700m if showers occur.
Chance of cloud free summits?	90%
Sunshine? Air clarity (below cloud)	Periods of sunshine; cloud sometimes filling in, particularly by afternoon. Visibility excellent.
How Cold? (at 700m)	0C rising to 3C.
And in the valleys	Slight frost some valleys at dawn; reaching 8 to 10C by afternoon.

Yorkshire Dales and North Pennines - Looking Ahead

	Thursday 15 April	Friday 16 April

Effect of wind on you?	Small	Negligible
How wet? (Precipitation and its impact)	Precipitation unlikely	Precipitation not expected
Cloud on the hills?	Generally clear	Little if any Chance of local patches of fog on some slopes from dawn, all dispersing.
Chance of cloud free summits?	Above 90%	90%
Sunshine? Air clarity (below cloud)	Variable cloud and sun, typically best toward west. Excellent visibility.	Sunshine most widely morning, giving way as cloud gradually fills in. Visibility excellent. Pockets of mist some valleys and hill slopes at dawn.
How Cold? (at 700m)	1C rising to 4C by afternoon, although eastern Pennines may stay cooler.	0C rising toward 4C.
And in the valleys	Frost at dawn in many valleys. Reaching 9 to 12C by afternoon, highest in west.	Frost in valleys and sheltered higher slopes at dawn. Reaching 12C by afternoon.

Planning Outlook**All mountain areas of Britain from Thursday, 15 April, 2021**

High pressure is expected to influence our weather patterns beyond the middle of April. Often dry. Temperatures near freezing point on higher summits, tending to rise most afternoons. Lying snow on higher terrain will thaw only slowly. Some further overnight frosts. Next week may become milder with time. Sun and variable cloud; most mountains often clear. Mostly light winds, but southerlies strengthen this weekend. A frontal system coming in from the west by Sunday-Monday is likely to bring low cloud and some rain for a time, mainly in the west.

Forecast issued at 16:19 on Tuesday, 13 April, 2021
