Based on forecast chart for noon 7 July, 2022

Scotland: Low cloud extensive west/northwest Highlands with drizzle toward west coast; more widely developing western hills later. Cloud breaking up to sunshine in the east.

England and Wales: Low cloud and patchy drizzle mostly clearing to sunshine, but may linger some western hills.

Headline for Yorkshire Dales and North Pennines

Early low cloud and patchy drizzle clearing with sunshine breaking through.

Detailed Forecast for Thursday, 7 July, 2022

How windy? (On the summits)	Northwesterly 15mph.
Effect of wind on you?	Small
How wet? (Precipitation and its impact)	Rain unlikely Risk where in cloud and perhaps at times Bowland area, pockets of fine drizzle, most likely morning.
Cloud on the hills?	All or nearly all clearing Initially very varied: fog may well cover some areas from lower slopes upward, whilst other areas have breaks to higher slopes. From late morning, most or all areas cloud free. However, very low cloud may continue to come and go Bowland area.
Chance of cloud free summits?	20% lifting to 90%
Sunshine? Air clarity (below cloud)	Sunshine will break through extensively and haze thin to give visibility excellent. May be often dull and hazy Bowland area.
How Cold? (at 700m)	15C afternoon.
And in the valleys	20 to 24C, but nearer 17C westernmost areas of Yorkshire.

Yorkshire Dales and North Pennines - Looking Ahead

	Friday 8 July	Saturday 9 July
How windy? (On the summits)	West to northwesterly 10 to 15mph, at times 20mph, and perhaps 25mph later.	Northwesterly 15 to 25mph, may ease further in afternoon.
Effect of wind on you?	Mostly small	Mostly small.
How wet? (Precipitation and its impact)	Occasional drizzle. Pockets of drizzle will come and go over the fells, most widely over the western Dales in the morning. Only occasional spots in the east where mostly dry.	Mostly dry Isolated fine drizzle possible western hills in low cloud, mostly morning.
Cloud on the hills?	Fairly extensive, bases slowly lifting Fairly extensive cloud covering the hills, lowest bases at first across the western Dales. However, bases will slowly lift, and perhaps clear some eastern hills.	Early low cloud mostly clearing. Murky start with areas of low cloud. Progressively low cloud will break up and lift in morning, so fells clear in the afternoon. Patches may linger in west.
Chance of cloud free summits?	40%	30% lifting to 70%
Sunshine? Air clarity (below cloud)	Overcast in west, sun breaking through progressively further east. Widely murky and misty in west, good in east.	Cloudy start, sun progressively breaking through. Visibility becoming good or very good.
How Cold? (at 700m)	14C	12 to 15C, warmest in the afternoon.
And in the valleys	21 to 23C	Lifting to 21 to 23C

Planning Outlook

All mountain areas of Britain from Friday, 8 July, 2022

Persistent high pressure off SW Britain will bring extensive dry weather to and through next weekend, although in western Scotland, with the wind off the sea, often cloudy and fronts may bring rain on Sunday.

On western mountains the cloud will bring persistent fog until Friday, even to lowest slopes near the coast. However, remaining murky toward west coast of Scotland with further drizzle at times.
