General Summary for Sunday, 7 August, 2022

British Mountain Summary:

Based on forecast chart for noon 7 August, 2022

Generally damp and murky across western Scotland, extensive fog from low elevations upward. Drizzly rain pushing northwards with lowering cloud bases. Largely dry eastern Highlands. Mostly dry northern England, some cloud banks on Lakeland tops. Widely breezy on hills. Sunny and warm for Wales and Peaks, lighter winds.

Headline for Yorkshire Dales and North Pennines

Fairly cloudy, generally dry. Breezy.

Detailed Forecast for Sunday, 7 August, 2022

How windy? (On the summits)	Westerly, 25 to 35mph, strongest for a few hours from dawn, then typically 20-25mph, strongest winds typically North Pennines tops where 30mph for periods all day.
Effect of wind on you?	Breezy across higher terrain, likely to impede ease of walking, buffeting gusts in places around higher tops, mainly northern areas. Feeling cool.
How wet? (Precipitation and its impact)	Rain unlikely Rare if any brief drizzly showers.
Cloud on the hills?	Mostly very little Patches of cloud may cover some western slopes early morning, but soon drifting above the hills or generally dispersing. May locally cap higher North Pennines at times late afternoon into evening.
Chance of cloud free summits?	70% rising to 90%
Sunshine? Air clarity (below cloud)	Sunshine and fair-weather cloud Yorkshire Dales, risk of more overcast skies for periods further north. Visibility very good.
How Cold? (at 700m)	10C rising to 13C. Wind chill will make it feel like 5C where exposed on high tops.
And in the valleys	Around 10C at dawn, rising to 19 to 22C by early afternoon, warmest eastern dales.

	Monday 8 August	Tuesday 9 August
How windy? (On the summits) Effect of wind on you?	West or southwesterly, 10 to 15mph, occasionally 20mph North Pennines, but often less southern Yorks Dales. Mostly small.	West or southwesterly, 10 to 15mph or less, strongest higher North Pennines. Mostly small.
How wet? (Precipitation and its impact)	No rain	No rain
Cloud on the hills?	Fells clear Rare fragments around some western slopes early morning, soon dispersing.	Fells clear
Chance of cloud free summits?	Above 90%	Practically certain
Sunshine? Air clarity (below cloud)	Often sunny, beware sunburn; a little fair-weather cloud building. Visibility excellent.	Strong sunshine and periods of high cloud. Beware sunburn. Visibility excellent.
How Cold? (at 700m) And in the valleys	12C rising to 15C. 10C or locally cooler at dawn, rising to 20 to 23C, warmest eastern dales.	15 to 17C 10C or below in some valleys at dawn. Rising to 21 to 24C, warmest eastern dales.

Planning Outlook

All mountain areas of Britain from Monday, 8 August, 2022

Southwesterly winds continue to influence Scotland. Rain or drizzle will be most frequent in the Northwest Highlands, where low cloud will often shroud coastal hills. Winds strengthening at times toward gale force on the tops, strongest later Tuesday. Further south and east across Scotland, it will be commonly dry with higher cloud bases, becoming warmer and more humid with time. High pressure extends across England and Wales, leading to a settled outlook for the week ahead here, generally dry with light winds, becoming increasingly warm or very warm, particularly in southern areas.
