And in the valleys	10C from dawn, rising to 12 to 14C, warmest in east.

Yorkshire Dales & North Pennines - Looking Ahead

	Wednesday 30 October	Thursday 31 October
How windy? (On the summits)	Southwesterly, 10 to 25mph.	Southwesterly, widely 20-30mph, less in the south. On northeastern side of Pennines gusts may exceed 40mph.
Effect of wind on you?	Small.	Blustery, walking impeded, gusts may locally throw you off balance. Significant wind chill.
How wet? (Precipitation and its impact)	No rain expected	Little or no rain Drizzly showers not fully ruled out, but most likely dry.
Cloud on the hills?	Hills widely covered Low cloud from lower slopes upward, covering the fells extensively, highest tops may be above cloud for a while. During the day cloud slowly thinning and partly breaking.	Extensive on lower terrain Cloud fairly persistent in the valleys and on lower fells. Above 600-700m likely clear.
Chance of cloud free summits?	30%	30%
Sunshine? Air clarity (below cloud)	Little to no sun. Mostly poor visibility.	Often very cloudy lower down, but some tops may stick out from the cloud. Excellent visibility if not in cloud.
How Cold? (at 700m)	9 to 12C	10 to 13C. With wind chill feels like below 5C.
And in the valleys	9C at dawn rising to 11-13C	10 to 14C, rising only a little through the day.

Planning Outlook**All mountain areas of Britain from Wednesday, 30 October, 2024**

West to southwesterlies prevail with high pressure extending across Britain for rest of the week, keeping dry conditions for most, although some rain may continue to affect northwest Scotland. Low cloud fairly widespread, some fog into valleys, with local inversion conditions developing. On Friday chillier northwesterly air is likely over the Highlands, dropping to freezing over higher Scottish mountains, some showers with snow - elsewhere dry and staying mild. Later back to west and southwesterlies, high pressure shows signs of keeping most of Britain dry until end of next week.
