General Summary for Thursday, 7 November, 2024

British Mountain Summary:

Based on forecast chart for noon 7 November, 2024

Another widely murky day, with hills often in or just below cloud, damp with local drizzle. Windy in Highlands, some upland gales. Best chances for sun in Snowdonia, in north Lake District and in Northwest Highlands and along Strathspey. Generally mild.

Headline for Yorkshire Dales & North Pennines

Mostly overcast and dull, breezy

Detailed Forecast for Thursday, 7 November, 2024

How windy? (On the summits)	Southerly, 15 to 25mph, locally 30mph.
Effect of wind on you?	Walking in places strenuous, marked wind chill, stability slightly affected.
How wet? (Precipitation and its impact)	No rain expected
Cloud on the hills?	Covered extensively Hills widely covered, perhaps down to lowest slopes, fog in the morning possible in the valleys. Highest tops may poke out of the cloud.
Chance of cloud free summits?	20%
Sunshine? Air clarity (below cloud)	Mostly overcast, little to no sun. Chance for clearing locally in North Pennines. Visibility mostly poor.
How Cold? (at 700m)	Around 6C, up to 10C when some sun appears.
And in the valleys	8 to 12C, almost constant through the day except for areas with some sun.

Yorkshire Dales & North Pennines - Looking Ahead

	Friday 8 November	Saturday 9 November
How windy? (On the summits) Effect of wind on you?	South to southeasterly, mostly 15 to 25mph, in the morning perhaps 30-35mph highest tops. Mostly small, blustery and affecting comfortable walking in the morning. Marked wind chill.	Southeasterly, 10-15mph. Small or negligible.
How wet? (Precipitation and its impact)	No rain expected	Rain unlikely
Cloud on the hills? Chance of cloud free summits?	Partly covered east and Yorks Dales Low cloud on eastern slopes and in Yorks Dales, around 600m, may in places extend much lower. Chance for clear tops above 700-800m. Northwest of Kirby Stephen often clear. 50%	Mostly covered Hills widely in cloud or just below it, bases between 500 and 800m. 30%
Sunshine? Air clarity (below cloud)	Sun appearing roughly northwest of Kirkby Stephen, here visibility only reduced through haze. Elsewhere poor visibility, murky.	Very little sun if at all appearing, mostly poor visibility due to extensive cloud and haze.
How Cold? (at 700m) And in the valleys	5 to 7C 6-8C at dawn, rising to 9 to 13C, warmest west if sun appears.	4 to 7C Between 5 and 9C

Planning Outlook

All mountain areas of Britain from Friday, 8 November, 2024

Southerly flow with cloudy and damp weather continues until Sunday, when a cold front from the Atlantic will bring some rain. This passes quickly and will be followed by westerlies bringing more sun beginning of next week. From Monday onward high pressure centres over the UK, sunnier and warmer conditions with hardly any rain are expected until Thursday, when another front will bring some rain and again cooler air. Unclear for next weekend, but high pressure, dry conditions are most likely.

Forecast issued at 15:35 on Wednesday, 6 November, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
