| | Sunday 11 May | Monday 12 May |
|---|---|---|
| How windy? (On the summits) | Southeasterly 15-20mph. Shifting easterly and approaching 25mph around dusk. | Easterly 20-25mph. Notable gusts over high terrain, risk up to 30mph. |
| Effect of wind on you? | Fairly small, comfortable walking affected in higher winds towards dusk. Some afternoon gusts over high terrain. | Walking starting to be impeded, gusts may briefly challenge stability. |
| How wet? (Precipitation and its impact) | Rain unlikely | Spots of rain Spots of rain develop after dawn, chance of frequent rain for a few hours in the middle of the day. |
| Cloud on the hills? | Not expected | Little or none A few local tops in cloud at dawn, bases soon lifting off hills. Some bases may briefly touch the highest tops if rain develops. |
| Chance of cloud free summits? | Nearly certain | 90% |
| Sunshine? Air clarity (below cloud) | Mostly sunny, some high cloud around. A patchwork of fair weather cloud builds after noon. Visibility excellent, some haze early. | Glimpses of sun, becoming more frequent late in the day. Good visibility, some haze east. |
| How Cold? (at 700m) | 10C rising to 15C. Locally warmer spots on western slopes | 10 or 11C, rising to 13C. Easternmost slopes may see little rise through the day. |
| And in the valleys | 5C at dawn, cooler in sheltered areas. rising to 18 to 20C. | 6C at dawn, some locally cooler sheltered valleys. Rising to 18C. |

Planning Outlook**All mountain areas of Britain from Sunday, 11 May, 2025**

Low pressure south and west of the British Isles will facilitate bursts of rain, possible thunderstorms, into Wales into early next week, some may reach into northwest England and west Scotland. The continental wind track and high pressure to the east will keep most cloud above the summits, with eastern areas often sunny. Generally settled conditions prevail mid-late week into next weekend as high pressure reestablishes just north of the British Isles. A mix of cloud and sun with light winds, generally easterly though variable. Slight frosts at dawn in sheltered spots, mostly warm by day. Very dry ground conditions, beware high risk of fire.

Forecast issued at 16:26 on Friday, 9 May, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
