General Summary for Thursday, 5 June, 2025

British Mountain Summary:

Based on forecast chart for noon 5 June, 2025

Still cold, particularly Scottish Highlands where in morning higher summits below freezing point. Here showery, particularly NW - hail, and snow higher tops. Further south rain on and off morning before improving to sunshine and scattered showers. Much less windy - still strongest N Scotland.

Headline for Yorkshire Dales & North Pennines

Fairly light wind. Still chilly. Some rain, mainly morning.

Detailed Forecast for Thursday, 5 June, 2025

How windy? (On the summits)	Southwest veering westerly 20mph.
Effect of wind on you?	Fairly small.
How wet? (Precipitation and its impact)	Rain on and off morning then isolated showers. Perhaps very little N Pennines. Morning: Rain on and off, although patchy N Pennines. Largely clearing toward midday. Afternoon: Scattered heavy showers.
Cloud on the hills?	All or nearly all clearing afternoon. Morning: Extensive fog on higher areas, a few patches below 300m mainly more western fells south of Tebay, and extensive above 450m to on northern Pennines mostly above 600m. Afternoon: Nearly all clearing - just patches on higher slopes near showers.
Chance of cloud free summits?	20% morning to 90% afternoon
Sunshine? Air clarity (below cloud)	Little or no sunshine and misty in rain morning. Patchwork of sunshine afternoon and visibility mostly very good or excellent.
How Cold? (at 700m)	8C.
And in the valleys	Between 11 and 14C, coldest in rain.

Yorkshire Dales & North Pennines - Looking Ahead

	Friday 6 June	Saturday 7 June
How windy? (On the summits) Effect of wind on you?	West backing southwesterly 15mph Small	Direction varied, 10mph or less morning. From the west becoming northwesterly 10 to perhaps in evening 15mph. Negligible.
How wet? (Precipitation and its impact)	Risk of scattered showers Briefly heavy showers here and there.	Heavy slow moving showers; thunder Confidence in detail low: Rain on and off morning. It may clear temporarily before the threat of heavy showers forming and drifting about only slowly. Hail and small risk thunder.
Cloud on the hills? Chance of cloud free summits?	Clearing most or all summits by afternoon Cloud base rising; by late morning most or all cloud above the summits. 90% by midday	Summits cloud free for periods, but forming from lower slopes in rain. Extensive fog higher areas, and locally on lower slopes morning - although generally cloud base will rise. In heavy rain, patches from lower slopes up, particularly above forest canopies - whilst in other areas breaks persist to higher slopes. 60%
Sunshine? Air clarity (below cloud)	Patches of sunshine, although particularly morning, mostly cloudy western Yorkshire dales. Very good or excellent visibility.	Sunshine coming through only rarely. Sometimes excellent visibility but expect areas of very poor visibility in and after rain.
How Cold? (at 700m) And in the valleys	6C near the coast, rising to 10C. 13 to 15C in afternoon, warmest eastern dales.	7C. May reach 15 or 16C temporarily in afternoon, but several degrees colder in rain.

Planning Outlook

All mountain areas of Britain from Friday, 6 June, 2025

Remaining chilly until Sunday night (intermittently near freezing point highest Scottish summits). Rainfall and low cloud will remain frequent across particularly western mountains until well into next week. Intermittently windy.
