General Summary for Monday, 16 June, 2025

British Mountain Summary:

Based on forecast chart for noon 16 June, 2025

A front draped over the Highlands brings low cloud and drizzly rain to western areas, heavier rain pushing northwards in the afternoon. Southwesterly winds will strengthen later in Scotland, becoming gales on higher mountains by evening. Dry with sunny spells and cloud clearing the tops in England & Wales.

Headline for Yorkshire Dales & North Pennines

Moderate breeze, windier into evening. Early low cloud clearing.

Detailed Forecast for Monday, 16 June, 2025

How windy? (On the summits) Effect of wind on you?	West then southwesterly, 20-25mph, up to 30mph high North Pennines early morning. Strengthening toward evening, reaching 35-40mph higher tops through to dusk and into night with possible stronger gusts northern areas. Breezy over higher fells, by evening increasingly affecting comfortable walking, becoming arduous higher areas up to sunset with marked wind chill.
How wet? (Precipitation and its impact)	Rain not expected
Cloud on the hills? Chance of cloud free summits?	Patchy low cloud breaking up Cloud banks mostly above 500-600m western Dales up to Tebay early morning, local patches on tops elsewhere. Tending to lift, thin and disperse, likely rising above all hills. 50% rising to 90%
Sunshine? Air clarity (below cloud)	Fairly cloudy in western Yorks Dales in morning, some sun north & eastern areas. Improving to a patchwork of cloud and sun, very good visibility.
How Cold? (at 700m) And in the valleys	11C, rising slightly afternoon. Will feel only just above freezing point directly in the wind early and late. 12C at dawn, rising to 17 to 20C in afternoon, warmest eastern dales.

Yorkshire Dales & North Pennines - Looking Ahead

	Tuesday 17 June	Wednesday 18 June
How windy? (On the summits) Effect of wind on you?	West to southwesterly 20 to 25mph, up to 30-35mph for a time early in day, strongest North Pennines. Breezy, starting to affect comfortable walking on exposed on high tops, risk more strenuous in morning.	Westerly 20mph. Fairly small
How wet? (Precipitation and its impact)	Rain and light showers for a time A period of showery rain during morning, mostly on western hills in Yorks Dales, fading to drizzly showers into afternoon, then becoming largely dry into the afternoon from north.	Rain not expected
Cloud on the hills? Chance of cloud free summits?	Covering higher fells, lifting later Covering higher tops during rain, locally to 500-600m western Dales for a time. Bases rising and cloud tending to break, clearing most or all tops with time during the afternoon, soonest North Pennines. 40% later 80%	Any patches clearing Patches of cloud may drift over some higher slopes in morning, mainly western Dales. Likely to all lift above summits. 80%
Sunshine? Air clarity (below cloud)	Cloudy morning into early afternoon, then patchwork of sun coming through. Hazy, then visibility becoming very good.	Patchwork of sun, best eastern dales. Visibility very good.
How Cold? (at 700m) And in the valleys	11C. 10C from dawn, rising to 18C afternoon.	8C rising to 11C. 11C at dawn, rising to 19C afternoon.

Planning Outlook**All mountain areas of Britain from Tuesday, 17 June, 2025**

Humid southwesterly winds early this week brings low cloud and spells of drizzly rain to western hills. High pressure to the south will tend to expand northwards during midweek, with dry conditions and warm air for all regions, sunshine and fair-weather cloud. Winds becoming light south to southeasterlies later in the week. Uncertainty by next weekend into early the following week, a risk of some rain or showers returning as pressure tends to fall.
