

# Yorkshire Dales & North Pennines

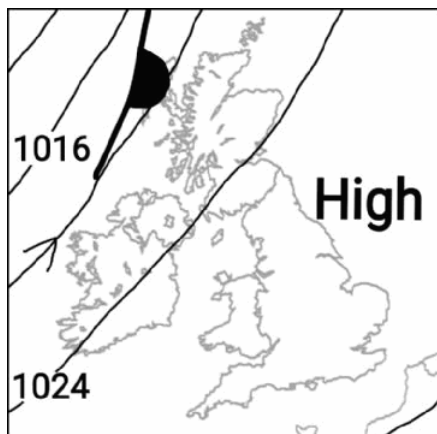

The entire Yorkshire Dales National Park and North Pennines AONB, including the Three Peaks and Cross Fell, plus Howgills, also south to Forest of Bowland.

**MWIS Wild Weekend - Ambleside - 25-26 October**

**Indoor-outdoor weather skills course - see [mwis.org.uk/information/day-with-mwis](http://mwis.org.uk/information/day-with-mwis) for info & booking**

## General Summary for Monday, 29 September, 2025

### British Mountain Summary:

**Based on forecast chart for noon 29 September, 2025**

Scotland: Southwesterly winds with a warm front bringing cloud and patchy rain into afternoon for western hills. Eastern hills substantially clear with morning sunshine.

England/Wales: Sunshine giving way to veil of cloud, with will lower onto higher western tops with local drizzle. Dry elsewhere.

### Headline for Yorkshire Dales & North Pennines

Sunny start, but fog banks. Clouding over afternoon, hills mostly staying clear.

## Detailed Forecast for Monday, 29 September, 2025

<b>How windy? (On the summits)</b>	Generally southwesterly though variable, 15mph or less. A slight increase N Pennines late in the day.
<b>Effect of wind on you?</b>	<b>Negligible</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Occasional light rain west Yorks Dales</b> Patchy drizzly rain drifts onto Three Peaks/Tebay fells occasionally. Some patchy light rain possible more widely late in the day.
<b>Cloud on the hills?</b>	<b>Mostly clear except west Yorks Dales</b> Local mist in dales with ragged cloud at various elevations on western fells, most likely Tebay to Three Peaks. Most cloud will lift and break through morning, though banks will graze the Three Peaks tops through the day.
<b>Chance of cloud free summits?</b>	<b>80%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Morning sunshine, then a veil of high cloud gradually thickens from the west. Good visibility, though morning haze south.
<b>How Cold? (at 700m)</b>	7 or 8C, rising locally to 9C eastern fells.
<b>And in the valleys</b>	5C from dawn, rising to 13C.

	Tuesday 30 September	Wednesday 1 October
<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	South to southwesterly, 15 to 20mph, occasionally 25mph higher North Pennines.  <b>Fairly small</b>	South to south-westerly 15 to 25mph.  <b>Mostly small</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Damp at times in west</b> Some patchy drizzle affecting western Yorkshire Dales NP at times. Elsewhere more often dry.	<b>Occasional rain an drizzle</b> Occasional rain, may well be persistent for a few hours in the morning when some heavy falls may occur. Small amounts come the afternoon.
<b>Cloud on the hills?</b>	<b>May persist western areas</b>  Low cloud mostly western areas up to Tebay, may cover hills above 400-600m for several hours, some breaks may form. Further north/east, covering higher slopes for periods, breaks above 800m.	<b>Fairly extensive</b>  Cloud covering upper slopes fairly extensively through the day, especially around Ingleborough. Best of the breaks will be east of the M74.
<b>Chance of cloud free summits?</b>	<b>30%</b>	<b>40%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Mostly cloudy, some glimpses of sun mainly eastern dales. Visibility good below cloud, but reduced if damp in west.	A little weak sun may come through a veil of cloud at times, mainly in the east. Visibility often good, but poor in rain.
<b>How Cold? (at 700m)</b>  <b>And in the valleys</b>	8C, little change all day where in cloud, clearer spots rising to 10C.  7C at dawn, locally cooler in sheltered spots. Rising to 15 to 17C afternoon, warmest eastern dales.	11C  Max temperature 15C

## Planning Outlook

**All mountain areas of Britain from Tuesday, 30 September, 2025**

Next week the UK is situated under a boundary between high and low pressure with a trend towards more settled conditions in the south, unsettled in the north. Northwest England and west Scotland could be rather wet with a southwesterly wind pushing cloud and spells of rain onto western hills. Several more organized frontal systems are likely to pass into eastern Scotland as well. Generally dry for the Pennines and Wales, though cloud and occasionally drizzly rain will impact western areas, notably Lakeland and Snowdonia. Sun breaks likely in England but short-lived. First indications of more widely unsettled weather into next weekend as a deeper area of low pressure passes north, though confidence remains low regarding timing and strength.

**Forecast issued at 16:30 on Sunday, 28 September, 2025**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
