## General Summary for Saturday, 7 February, 2026

### British Mountain Summary:

#### Based on forecast chart for noon 7 February, 2026

Continuing with the east to south-easterly airflow with hills shrouded in extensive low cloud with widely murky conditions. Patchy snow across the Highlands tending to ease, best breaks again toward the northwestern coasts of Scotland. Showery rain extending north through Wales into northern England.

#### Headline for Yorkshire Dales & North Pennines

## Detailed Forecast for Saturday, 7 February, 2026

<b>How windy? (On the summits)</b>	Easterly veering into south-east, 15 to 25mph.
<b>Effect of wind on you?</b>	Mostly small
<b>How wet?</b> (Precipitation and its impact)	<b>Some patchy rain early and late in day.</b> Any early light rain, with flurries over the tops, from dawn will soon fizzle out. Then mostly dry for a time, before showery bursts of rain move up from the south by mid afternoon.
<b>Cloud on the hills?</b>	<b>Extensive on the fells</b> Widespread fog above 200 to 450m, although may improve on more western slopes - 450 to perhaps 600m - afternoon.
<b>Chance of cloud free summits?</b>	<b>Almost nil</b>
<b>Sunshine?</b> Air clarity (below cloud)	No sun expected.  Murky with poor visibility in any patchy precipitation.
<b>How Cold? (at 700m)</b>	-1C lifting to plus 2C.
<b>And in the valleys</b>	5C

## Yorkshire Dales &amp; North Pennines - Looking Ahead

	Sunday 8 February	Monday 9 February
<b>How windy? (On the summits)</b>	Southerly typically 15 to 20mph possibly 25mph at times.	South-easterly 15 to 25mph.
<b>Effect of wind on you?</b>	<b>Mostly small</b>	<b>Mostly small</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain now and again</b> Rain and drizzle on and off - may not amount to a great deal in total.	<b>Patches or spots of rain here and there</b> Patches of rain, or just occasional spots, here and there. Amounts small, but nonetheless giving damp weather at times.
<b>Cloud on the hills?</b>	<b>All or nearly all fells persistently covered.</b> Persistent fog most of region, but by afternoon perhaps a few breaks to 600m and here and there higher slopes briefly clearing or between cloud layers.	<b>Extensive</b> Extensive low cloud shrouding the hills, down to mid to lower slopes. Highest bases westernmost hills in the Dales.
<b>Chance of cloud free summits?</b>	<b>Less than 10%</b>	<b>10%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Widely dull, misty or murky.	Overcast.  Widely misty and murky.
<b>How Cold? (at 700m)</b>	3C	3C
<b>And in the valleys</b>	Reaching 6C in the afternoon.	Lifting to 5 or 6C

## Planning Outlook

### All mountain areas of Britain from Sunday, 8 February, 2026

Overall little change in conditions over the coming week: the mountains extensively foggy, precipitation from time to time (again concentrated on eastern Scotland and southern and eastern Wales) and often strong southeast or easterly wind. However, a slight rise in temperature will result in thawing of lying snow from southern Scotland southwards and some thawing up to around 900, sometimes 1050m Scottish Highlands - although the return of low freezing level toward the middle of next week.

### Forecast issued at 15:01 on Friday, 6 February, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
