General Summary for Tuesday, 4 August, 2026

British Mountain Summary:

Based on forecast chart for noon 4 August, 2026

Extensive rain and low cloud across Scotland, becoming thundery downpours into the afternoon from the south into the Highlands. For England & Wales, rain and low cloud most persistent in the morning, heavy showery bursts in middle of day tending to clear eastward afternoon. Strong and gusty winds widely.

Headline for Yorkshire Dales & North Pennines

Low cloud, thundery bursts of rain; improving later. Breezy.

Detailed Forecast for Tuesday, 4 August, 2026

How windy? (On the summits)	South turning southwesterly 20 to 25mph, gusty 30mph around showers.
Effect of wind on you?	In places fairly small, but often blustery over exposed high terrain, sudden buffeting near showers.
How wet? (Precipitation and its impact)	Rain and heavy showers, risk thunder, improving later afternoon Rain fairly extensive from dawn, some heavy bursts, possibly thundery. Breaking up into heavy showers tracking northeastward across the area, risk of thunder and lightning middle of day into afternoon, but tending to clear to just well scattered brief showers later afternoon-evening.
Cloud on the hills?	Low cloud rising, breaks later In morning, expect blanket of fog across higher areas, ragged patches to some lower slopes. An improvement during the day as cloud base lifts upper slopes, and some breaks to most summits later in day.
Chance of cloud free summits?	30% rising to 80% later afternoon
Sunshine? Air clarity (below cloud)	Cloudy murky start. Sunshine breaking through mainly later in the afternoon. Hazy, and visibility poor in rain, improving to become increasingly very good later.
How Cold? (at 700m)	14C, rising to 17C afternoon out of cloud, humid.
And in the valleys	15C from dawn, rising to 22C in afternoon.

All mountain areas of Britain from Wednesday, 5 August, 2026

Low pressure over the country during midweek brings strong winds, rain and thundery showers. Trending toward westerlies later in the week and into weekend, by then most rain and low cloud in western Scotland, but showery rain elsewhere at times, accompanied by periods of strong to gale force mountain winds at times. Generally fresh temperatures widely, often in mid-single figures over Scottish high tops. Despite falls of rain, beware of ongoing fire management restricting access to hills locally.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
