General Summary for Friday, 25 September, 2026

British Mountain Summary:

Based on forecast chart for noon 25 September, 2026

Windy in Scotland, showers west, only scattered eastward where often sunny; wind lessens for a time afternoon. Patchy rain England and Wales, tending to break up in north England later. Rain and cloud linger in Wales and south Pennines but rainfall totals small; mild-to-warm, little wind in Wales.

Headline for Yorkshire Dales & North Pennines

A little patchy rain, turning drier and brighter north

Detailed Forecast for Friday, 25 September, 2026

How windy? (On the summits) Effect of wind on you?	West to southwesterly 10 to 25mph, speed likely to vary during the day, always lightest speeds in the south. May be nearer 30mph over high fells early in the day, and will tend to strengthen into and overnight. Fairly small, but blustery in exposure early and late in the day.
How wet? (Precipitation and its impact)	Rain mostly west in morning breaks to light spots Rain arriving before dawn, some steady falls in western Yorks Dales NP to start, but generally patchy elsewhere. Fading to just occasional rain, small rainfall totals.
Cloud on the hills? Chance of cloud free summits?	Mostly early in western Dales, rising and breaking from north Shrouding Three Peaks to Howgills areas in morning above 500-600m, some lower banks for a time in rain. Higher bases north and eastward, and breaks form to most tops as the day progresses, cloud breaking up from the north. 30% rising to 80%
Sunshine? Air clarity (below cloud)	Largely cloudy morning, brighter skies and some weak sun breaking out afternoon from the north. Visibility reduced in early rain, poor southwest; improving during day to good.
How Cold? (at 700m) And in the valleys	8 to 10C, little change all day, though starting nearer 11C Yorks Dales NP. Feeling like 2C in stronger wind. 10 to 12C much of the day, may start a degree milder, particularly south and east Yorks Dales NP.

All mountain areas of Britain from Saturday, 26 September, 2026

South to southwesterly winds prevail onward into the weekend and next week. Saturday will be bright for many, windy in Scotland with some showers in the west. Mild-to-warm temperatures, but a chilly feeling north in wind. A band of rain sweeps eastward more broadly on Sunday; rain could be very heavy for a few afternoon hours. A window of higher pressure is indicated for Monday with warmer, brighter conditions for many, but northwest Scotland starts breezy with cloud and some light rain. Into mid-next week, risk of a more widespread gale, or severe gale over higher mountains. Detail of timing is uncertain, but several bands of rain punctuated by showers and bright spells will likely cross most mountain areas. Unseasonably warm temperatures. The weather stays mixed into early October.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
