General Summary for Monday, 2 November, 2026

British Mountain Summary:
Based on forecast chart for noon 2 November, 2026

Light winds for much of the Highlands; a stronger northeasterly breeze for England & Wales, particularly toward the south, feeling chilly. Generally dry, sunshine best in southern Scotland and toward the Irish Sea coast. Some cloud banks in northern Scotland, but high mountains may poke out above this.

Headline for Yorkshire Dales & North Pennines

Moderate-fresh breeze. Patchy cloud, sunnier west.

Detailed Forecast for Monday, 2 November, 2026

How windy? (On the summits)	Northeasterly 15 to 25mph, tending to rise during the day, gusty in places around high tops and toward the west.
Effect of wind on you?	**Fairly small, but feeling chilly over exposed slopes and more noticeably breezy as the day goes on.**
How wet? (Precipitation and its impact)	**Rain unlikely** Chance of a little drizzle if cloud thickens over the eastern side of the Pennines, mainly later in the day.
Cloud on the hills?	**Capping some tops at times; little west** Patchy cloud grazing higher slopes mostly North Pennines and occasionally highest tops elsewhere, but often lifting above most hills; frequently clear westwards.
Chance of cloud free summits?	**70% northeast, to 90% western dales.**
Sunshine? Air clarity (below cloud)	Fairly cloudy sky, occasional sun, mostly toward west and south. Visibility very good, some haze lower down.
How Cold? (at 700m)	2 to 4C, coolest North Pennines. Feeling nearer -5C directly in wind.
And in the valleys	Patchy frost in valleys at first. Rising to 11C afternoon.

Yorkshire Dales & North Pennines - Looking Ahead

	Tuesday 3 November	Wednesday 4 November
How windy? (On the summits) **Effect of wind on you?**	East to northeasterly 20 to 25mph, some gusty areas 30mph around higher Pennines, locally downslope to west. **Starting to affect comfortable walking on exposed terrain and some more noticeable gustiness affecting balance. Feeling chilly.**	Easterly 20 to 30mph, locally varying, but gusty in places around higher tops and locally down western slopes. **Affecting ease of walking on exposed higher slopes, gusts affecting balance in places. Marked wind chill.**
How wet? (Precipitation and its impact)	**Some drizzly rain** A little light rain or drizzle occasionally, mostly eastern side of the Pennines, patchier westwards.	**Occasional spots** A little light rain in the wind from time to time, mostly more eastern areas.
Cloud on the hills? **Chance of cloud free summits?**	**Most frequent north, breaks west** Cloud banks rolling across high terrain, the base mostly around 700m, perhaps slightly lower in east for a time. Good breaks likely around the Three Peaks, but patches may often cap higher North Pennines. **30% north/east, to 60% western dales.**	**Varying on high tops** Banks of cloud likely to come and go above 700m, most often in eastern areas, well broken toward the west. **60%**
Sunshine? Air clarity (below cloud)	Fairly cloudy, a little sun breaking through, mostly western dales. Visibility very good out of cloud.	Fairly cloudy, sun breaking through at times mostly toward west. Visibility good, though some haze.
How Cold? (at 700m) **And in the valleys**	3 to 5C, coolest North Pennines. Feeling nearer -5C directly in the wind. 6C at dawn, up to 11C afternoon.	4C. Feeling like -5C directly in the wind. 6C from dawn, rising to 9 to 11C afternoon, coolest in east.

Planning Outlook

All mountain areas of Britain from Tuesday, 3 November, 2026

A settled week ahead as high pressure resides toward the north. Easterly winds will prevail, strongest for Wales and the southern Pennines. Largely dry weather, whilst variable cloud will be drawn in from the North Sea, at times some light showers in eastern areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows; then cooler toward the weekend on tops. Quiet weather also likely as next weekend begins, perhaps further ahead, though a mixed Atlantic influence may return to Scotland.

Forecast issued at 16:00 on Sunday, 1 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
