Yorkshire Dales & North Pennines

The entire Yorkshire Dales National Park and North Pennines AONB, including the Three Peaks and Cross Fell, plus Howgills, also south to Forest of Bowland.

Evening with MWIS - Kendal - Thursday 19th November 2026
Classroom weather workshop supporting Kendal Mountain Search and Rescue Team

General Summary for Tuesday, 10 November, 2026

British Mountain Summary:
Based on forecast chart for noon 10 November, 2026

Much of Scotland dry with sunshine; areas of low-level fog and frost. Some showers toward the far north. Fog from lower elevations upward for Pennines and east Wales, but much of northwest Wales and the Lakes have clearer hills. Rain moves into south Wales. Strong easterly winds for Wales.

Headline for Yorkshire Dales & North Pennines

Low cloud mostly east. Local gusty wind.

Detailed Forecast for Tuesday, 10 November, 2026

How windy? (On the summits)	Southeasterly 15 to 20mph, some gusts 25mph around southernmost areas mainly afternoon.
Effect of wind on you?	**Fairly small, some more noticeable gusts develop in places.**
How wet? (Precipitation and its impact)	**Rain not expected**
Cloud on the hills?	**Mix of cloud and fog, better west** Various cloud banks, including some fog on lowest terrain. A deck of cloud drifts onto the eastern side of the Pennines, breaking westwards. Some slopes may emerge between cloud layers.
Chance of cloud free summits?	**40%**
Sunshine? Air clarity (below cloud)	Sun fairly weak through high cloud, whilst eastern areas more generally cloudy, hazy or misty.
How Cold? (at 700m)	3C. Feeling like -3C in stronger wind.
And in the valleys	Frost in sheltered valleys early morning, mainly west and northern areas. Rising to 7 or 8C afternoon.

Yorkshire Dales & North Pennines - Looking Ahead

	Wednesday 11 November	Thursday 12 November
How windy? (On the summits) **Effect of wind on you?**	Easterly 15 to 20mph, gusts 25mph or locally stronger early in day. Tending to drop lighter and variable afternoon. **Some gusty areas may start to affect ease of walking on exposed terrain in morning, but becoming small.**	Northerly 25 to 35mph, strongest over higher North Pennines, possibly 40mph for a time. **Affecting comfortable walking on exposed terrain, strenuous higher up with some buffeting. Significant wind chill.**
How wet? (Precipitation and its impact)	**Largely dry** Chance of an odd light shower mainly eastern Pennines in morning, sleet or a snow flurry on higher tops.	**No precipitation expected**
Cloud on the hills? **Chance of cloud free summits?**	**Mostly north and eastern tops** Patchy cloud rolling over higher slopes mostly toward the east and northeast Pennines, but breaking westwards with tops more often clear around Three Peaks. **40% high N Pennines, to 70% W Dales.**	**None expected** **Above 90%**
Sunshine? Air clarity (below cloud)	Sun best in west and southern areas, more cloud likely to come and go in northeast. Visibility excellent out of cloud.	Extensive sunshine. Visibility excellent.
How Cold? (at 700m) **And in the valleys**	1 to 3C, coldest North Pennines. Feeling like -5C in the wind in the morning. Frost in sheltered valleys in the morning, mainly in western dales. Rising to 7 or 8C during middle of day.	Around 0C. Feeling like -10C directly in the wind, risk -15C higher Pennines at times. Frost widely in valleys in morning. Rising to max 7C afternoon.

Planning Outlook

All mountain areas of Britain from Wednesday, 11 November, 2026

Dropping colder across all mountains during midweek as the wind shifts northerly and strengthens. Some showery snowfall across the Highlands on Wednesday, otherwise plenty of sunshine and very clear air late this week, for all areas - clearing away fog from early in the week. Into the weekend, as the wind shifts west then southwesterly, less cold air drifts in from the Atlantic bringing more cloud onto western hills - an increasing risk of rain in the west. A changeable outlook into next week with varying temperatures, stronger wind at times, rain and some upland snow possible. Unsettled patterns are more likely to prevail beyond mid-month.

Forecast issued at 16:05 on Monday, 9 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
